Europe needs a lot of battery metals...

>500 GWh battery manufacturing capacity by 2030 to supply electric vehicle (EV) market

Per annum, this equates to approximately:

- 100,000 tonnes of cobalt
- 315,000 tonnes of nickel
- 800,000 tonnes of copper

ESG compliant?

CO2 Emissions per
kg of material produced

Ni

13kg
CO2

Co

11kg
CO2

Cu

5kg
CO2

...with low CO2 footprint: EU Battery Regulation

Combined, this EU Cu-Ni-Co metal requirement
for EVs will emit approximately:

10M^t CO₂

Eq. per annum

Environment

EU Regulation: From 1 January 2026, lithium-ion batteries will have to bear a carbon intensity performance class label and from 1 July 2027, must comply with maximum carbon footprint thresholds. The EU will ban batteries not meeting the new regulation.

...ethically sourced

- Current strong ethical traceability issues for cobalt: child labour, exploitation, corruption.
- International Rights Advocates file federal case on behalf of children killed in DRC cobalt mines.

Social

EU regulation: Manufacturers will have to demonstrate that they are sourcing raw materials in a responsible way through a digital passport tracking all battery materials used in the battery composition.

...and responsibly
sourced

Tesla's nickel quest highlights metal's
environmental burden¹

Waste linked to mining of key EV battery component threatens marine life

**Chinese-owned Ramu Nickel plant spills 200,000
litres of 'toxic' slurry into the sea²**

Indonesian miners eyeing EV nickel boom seek to dump waste into the sea³

Governance

EU regulation: for requirements related to the carbon footprint and the responsible sourcing of raw materials, mandatory third-party verification will be required. Each battery will have a digital passport tracking all components coming from upstream.

Norway – Active Mining Jurisdiction & Leader in Renewable Energy

Norwegian mining industry
secretary general
Anita Hall

*"I think it is **urgent** to find out what is hiding **under the surface** in Norway. Not just for battery factories, but really for all industry and everything around the **green shift**. We have become **too dependent on other countries** and continents such as China, Africa, South America and other places, which may have completely different conditions than what we like to compare ourselves with when it comes to **human rights, environment and ethics**."*¹

Cobalt Fundamentals

Global Cobalt Market Balance (%)

Source: Wood Mackenzie

Cobalt demand is forecast to roughly double by 2030, with battery applications accounting for majority of overall demand. Despite the growing trend towards reduced use of cobalt per unit in the automotive sector driven by cost and ESG concerns, on a contained basis, cobalt demand would still be boosted by the growing penetration of EVs and exponential growth in EV sales in the coming decade.

Source: Roskill

Cobalt – Battery Market Share (%)

Source: Wood Mackenzie

98% of Cobalt production is mined as a by-product

Source: Global Energy Metals

60% of Cobalt resources are in the DRC

The DRC is one of the poorest, most corrupt, and most coercive countries on the planet

The DRC has had more deaths from war since WWII than any other country on the planet

Artisanal mining and child labor

The country has a failing infrastructure

Skuterud Cobalt Project

The historical home of cobalt production

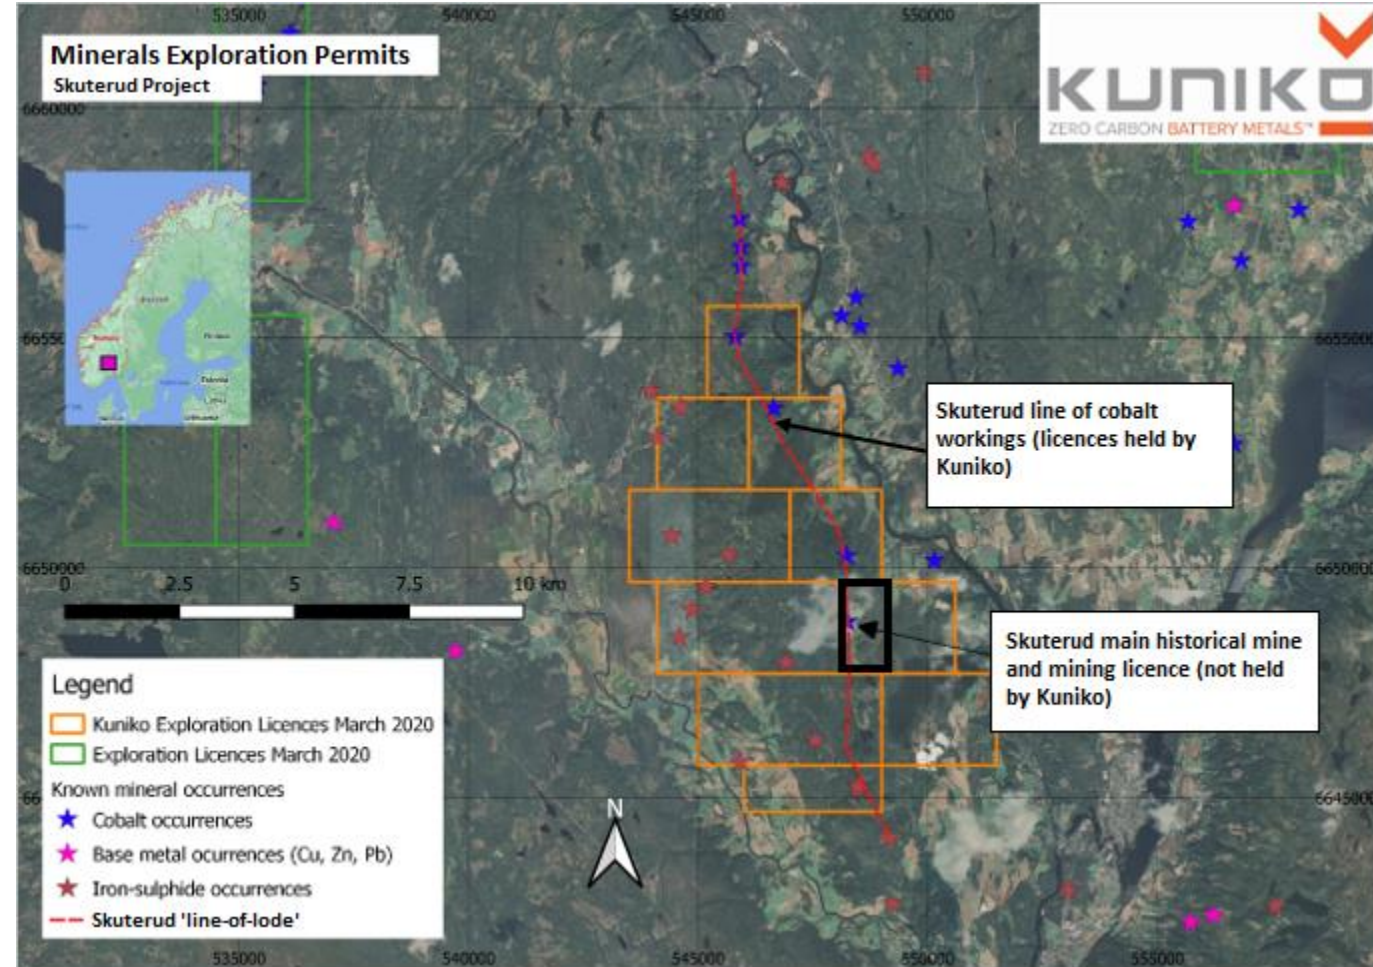

- Skuterud: Over **1 million tonnes of cobalt ore mined*** from 1773-1898, the **world's largest cobalt producer** & Norway's largest company at the time
- Ca. 9km trend of historic cobalt workings along Skuterud trend – **>100 years of mining**
- Maiden drill results identified multiple zones of cobalt mineralization

Granted Cobalt Tenements	Total Area (km ²)
Skuterud 101-110	52.12
Total	52.12

*Refer Horneman, 1936

One of the main cobalt minerals, skutterudite, is named after the Skuterud mine where it was discovered.

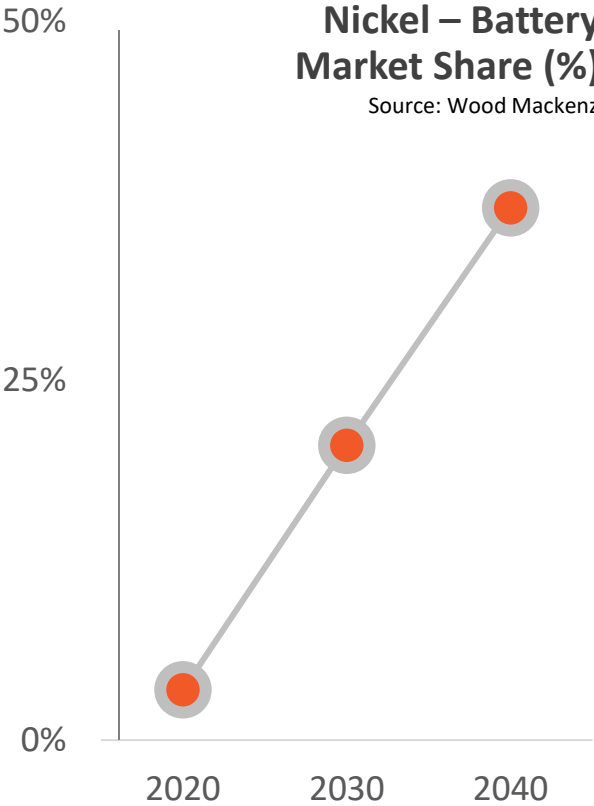

Nickel fundamentals

Copper Projects

High grades, rich history of production

Vangrøfta:

- Historical Fredrik IV Mine - 30 years of small tonnage production up to 1908 @ 6% Cu grade*.
- Sampling by Kuniko yielded up to 16.75% Cu, 3.33g/t Au and 0.2% Co from waste dumps**.

Undal:

- Long history of underground production between 1668 - 1971
- Historical production grades 1.15 % Cu, 1.86 % Zn, low tonnage mined (<1Mt)*.
- Mineralisation thickness reaches 10 m, but generally varies between 3 and 6 m*.

Nyberget:

- Small scale historical production 1650-1750, surface grades** up to 2% Cu

Granted Copper Tenements	Area (km2)
Undal 101-102	20.00
Nyberget 101-102	20.00
Vangrøfta 102	10.00
Total	50.00

*Refer NGU, 2019 . **Refer Koppar Resources ASX Announcements (see References).

Current Exploration Activities

On ground exploration has commenced – First results expected September 2021

Skuterud:

- A combined rock and soil sampling program has commenced, covering the “**Fahlband Ore Zone**” present in the eastern Skuterud licences, at 50 x 100 m line spacing.
- Data will augment that collected by previous explorers and allow outlining and evaluation of geochemical anomalies, which along with new geophysical data, will be used to define drill targets for 2022.

Vangrøfta:

- Geochemical sampling program to follow completion of the work at Skuterud.
- Sampling grid will cover the entire Vangrøfta licence area, aiming to outline **copper-zinc targets**, again in conjunction with newly collected airborne geophysical data.

Feøy and Romsas **Nickel** Projects:

- Rock sampling program conducted earlier in 2021 – results expected September 2021

Skuterud Soil Sampling

Current Exploration Activities

Significant Airborne Geophysics Program

Commencement of surveys imminent - September 2021:

- All of the Kuniko licence areas have seen little modern exploration, despite being significant historical producers of nickel, cobalt, copper and zinc
- Kuniko has commissioned airborne geophysical surveys over the Skuterud, Vangrøfta and Undal Project areas.
- Surveys will comprise airborne magnetics, electromagnetics (EM), IP and radiometrics (Skuterud only)
- Data expected to be available in October 2021, and will be integrated with historically available and newly collected geochemical and geological data.
- Expected to significantly contribute to a comprehensive evaluation of the potential of the project areas and to enable detailed planning of drilling for 2022.

Vulcan Energy Resources Limited	25.85%
J P Morgan Nominees Australia Pty Ltd	6.09%

Kuniko Team

Gavin Rezos

Chairman

- Executive Chair/CEO positions of two companies that grew from start-ups to the ASX 300. Extensive international investment banking experience.
- Investment banking Director of HSBC with senior multi-regional roles in investment banking, legal & compliance functions.
- Currently Chair of Vulcan Energy Resources, Resource & Energy Group & principal of Viaticus Capital.
- Previously Non-Executive Director of Iluka Resources, Alexium International Group & Rowing Australia.

Antony Heitmann
Beckmand

CEO

- Qualified CPA with a Bachelor of Commerce from UWA. Also holds a Graduate Diploma in Applied Finance & Investment.
- Over 25yr experience in financial & executive roles within the mining industry, including 12 years with Norway's Sydvaranger iron ore project in CEO & CFO roles, & 2 years as a director of Nordic Mining ASA.
- Previous experience with Kalium Lakes Ltd, Exxaro Resources, Perilya Ltd & Robe River Iron Associates.
- Mr Beckmand is an Australian citizen & resides in Norway.

Brendan Borg

Non-Executive Director

- Consultant geologist who has specialised in the "battery materials" sector including lithium, graphite, cobalt & copper projects.
- 25y experience in management, operational & project development roles in mineral exploration & mining, with companies including Rio Tinto Iron Ore, Magnis Resources & IronClad Mining.
- More recently he was a co-founder and Managing Director of ASX & TSXV listed gold explorer, Tempus Resources Limited.
- Non-Executive Director of gold producer and lithium developer Firefinch (ASX:FFX).

Maja McGuire

Non-Executive Director

- Consultant lawyer with almost 15y experience in the provision of corporate & compliance advice to ASX listed public companies. Holds BComm and LLB qualifications from The University of Western Australia.
- Experience includes working with listed companies as a non-executive director, general counsel & company secretary (ASX:AVR, ASX:AJX) & in top-tier private practice (Clayton Utz).
- Current Non-Executive Chair of TechGen Metals Limited (ASX:TG1) & Non-Executive Director of Olive X Holdings Limited (NSX:OLX).

Birgit Liodden

Non-Executive Director

- Self-made entrepreneur & business activist working on sustainability, entrepreneurship, next generation & diversity in the maritime industry.
- 15 years background from international shipping. Former Director of Nor-Shipping, Founder of YoungShip International and Director of Sustainability, Ocean & Communication at Oslo Business Region.
- Current Chair of the Norwegian Organization for Environmental Boats. Founder & CEO of The Ocean Opportunity Lab (TOOL). Board member of TECO2030 ASA, The Factory, GreenStat, Bellona Foundation.

Rune Wilberg

Consultant Geologist

- Geologist (Msc) with more than 35 years experience in Norwegian mineral exploration industry.
- 1985-97: Worked at the Geological survey of Norway.
- Since 1998: Worked as a resource-geological consultant for various mining & exploration companies in Norway, Greenland & Sweden, mainly with base metals, gold & molybdenum.

Amanda Scott

Consultant Geologist

- BSc Geology, Fellow of the Australian Institute of Mining & Metallurgy.
- Whilst in Western Australia, Amanda worked in both the Pilbara & Yilgarn Cratons exploring for gold, nickel, iron ore & manganese & is credited with the discovery of high-grade iron ore at Jigalong in the East Pilbara.
- Has lived & worked in Scandinavia as a geologist since 2011 in a range of commodities including base-metals.
- Principal of Scott Geological consulting, based in northern Scandinavia.
