## Annexure I (Mining Entities)

Name of entity

ABN/ARBN/ARSN

TNT Mines Limited

ACN 107 244 039

This Annexure forms part of the Information Form and Checklist supplied by the entity named above to support its application for admission to the official list of ASX Limited (ASX) as an ASX Listing.

A reference in this Annexure to JORC means the Australasian Code for Reporting Exploration Results, Mineral Resources and Ore Resources - 2012 Edition, a copy of which is included in Annexure 5A of the Listing Rules. Terms used in this Annexure which are defined in JORC (including, without limitation, 'exploration target', 'exploration results', 'mineral resource', 'ore reserve' and 'competent person') have the same meaning as in JORC.

<sup>3</sup> Actual assumed prices should be disclosed. It is not sufficient to refer to a "spot price", without disclosing the actual price in question. Where the actual assumed prices used are said to be commercially sensitive, the entity must disclose sufficient information, perhaps in narrative rather than numerical form, for investors to understand the methodology it has used to determine these prices.

<sup>4</sup> Estimates of metallurgical recoveries for each metal must be used to calculate meaningful metal equivalents. Reporting on the basis of metal equivalents is not appropriate if metallurgical recovery information is not available or able to be estimated with reasonable confidence.

26. Please enter "Confirmed" in the column to the right to indicate that the following JORC requirements have been satisfied:

- the mineral resource estimate has been appropriately classified according to increasing geological confidence (ie inferred, indicated or measured – JORC clause 20-24);
- if an estimation of an inferred mineral resource is presented on the basis of extrapolation beyond the nominal sampling spacing and taking into account the style of mineralisation, the report contains sufficient information to inform the reader of:
  - the maximum distance that the resource is extrapolated beyond the sample points;
  - the proportion of the resource that is based on extrapolated data;
  - the basis on which the resource is extrapolated to these limits; and
  - a diagrammatic representation of the inferred mineral resource showing clearly the extrapolated part of the estimated resource (JORC clause 21);
- the mineral resource estimate has been rounded off to appropriately significant figures, is referred to as an estimate not as a calculation and, in the case of inferred mineral resources, is qualified by the term 'approximately' (JORC clause 25);
- where contained metal or mineral content has been reported, corresponding tonnages and grade have also been reported (JORC clause 26);
- inferred, indicated or measured resources have not been reported as a combined estimate unless details for the individual categories have also been provided (JORC clause 26); and
- resource estimates have not been aggregated with reserve estimates to report a single combined figure (JORC clause 26).
