Spark Plus Battery Metals Day Webinar

Volt Resources Limited (ASX: VRC) (“Volt Resources” or the “Company”) is pleased to announce its participation in Spark Plus’s Battery Metals Day on 27th May 2021.

Managing Director, Trevor Matthews will present on the Company via a zoom Webinar on 27 May 2021 from 1pm AEDT / 11.00am AWST. This webinar will be hosted live via Zoom and will provide viewers the opportunity to hear from, and engage with, a range of ASX-listed micro/mid-cap companies involved in the battery metal space.

To access further details and register your interest, please go to the following link:

https://us02web.zoom.us/webinar/register/4716202064263/WN_wv_PyENoSH2v28PszdMAug

After registering your interest, you will receive a confirmation email with information about joining the webinar. Participants will be able to submit questions via the panel throughout the presentation; however, we encourage shareholders and investors to send through questions via email beforehand.

A copy of the investor presentation to be delivered during the webinar will be available on the ASX platform prior to the webinar.

About Volt Resources Limited

Volt Resources Limited (“Volt”) is a graphite and gold exploration and development company listed on the Australian Stock Exchange under the ASX code VRC. Volt is currently focused on the exploration and development of its wholly-owned Bunyu Graphite Project in Tanzania, as well as the creation of a new gold exploration and development business through leveraging the Company’s existing extensive networks in Africa.

The Bunyu Graphite Project is ideally located near to critical infrastructure with sealed roads running through the project area and ready access to the deep-water port of Mtwara 140km from the Project. In 2018, Volt reported the completion of the Feasibility Study (“FS”) into the Stage 1 development of the Bunyu Graphite Project. The Stage 1 development is based on a mining and processing plant annual throughput rate of 400,000 tonnes of ore to produce on average 23,700tpa of graphite products¹. A key objective of the Stage 1 development is to establish infrastructure and market position in support of the development of the significantly larger Stage 2 expansion project at Bunyu.

The Guinea Gold Projects comprise 6 permits in Guinea, West Africa having a total area of 348km. The projects are located in the prolific Siguiri Basin which forms part of the richly mineralised West African Birimian Gold Belt.

¹ Refer to Volt’s ASX announcement titled “Positive Stage 1 Feasibility Study Bunyu Graphite Project” dated 31 July 2018. The Company confirms that it is not aware of any new information or data that materially affects the information included in this document and that all material assumptions and technical parameters underpinning the estimates continue to apply and have not materially changed.
