**10 December 2021**

**VOLT RESOURCES TO PRESENT AT MINING DAY WEBINAR  
HOSTED BY SPARK PLUS**

Graphite producer and battery anode material developer **Volt Resources Limited (ASX: VRC)** (“**Volt**” or “**the Company**”) is participating in a free online Zoom webinar being hosted by Spark Plus on Tuesday, 14 December 2021 to discuss its recent strategic acquisitions in lithium and graphite in Europe, its Bunyu Graphite Project in Africa and downstream solutions to meet the fast-growing battery demand in Europe and the US.

Event: Spark Plus Mining Day

Date / Time: Tuesday 14 December at 11.40am AWDT/2.40pm AEST

Presenter: Trevor Matthews, Managing Director

Register in advance for this webinar:

## **About Volt Resources Limited**

Volt Resources Limited (“Volt”) is a graphite producer/developer and gold exploration company listed on the Australian Stock Exchange under the ASX code VRC. Volt has a 70% controlling interest in the Zavalievsky Graphite business in Ukraine. Zavalievsky is in close proximity to key markets with significant developments in LIB facilities planned to service the European based car makers and renewable energy sector. Zavalievsky benefits from an existing customer base and graphite product supply chains based on excellent transport infrastructure covering road, rail, river and sea freight combined with reliable grid power, ample potable ground water supply and good communications. Zavalievsky has current plans to install a processing plant and equipment in order to commence production of spheronised purified graphite (SPG) for the European LIB market <sup>1</sup>.

Volt acquired three licence applications that are considered to be prospective for lithium-borate mineralisation. The licence applications are in respect to a total area of 291km<sup>2</sup>, located in Serbia and are west and south-west of the Serbian capital, Belgrade<sup>2</sup>.

Volt is progressing the development of its large wholly-owned Bunyu Graphite Project in Tanzania, as well as gold exploration in Guinea leveraging the Company’s existing extensive networks in Africa.

The Bunyu Graphite Project is ideally located near to critical infrastructure with sealed roads running through the project area and ready access to the deep-water port of Mtwara 140km from the Project. In 2018, Volt reported the completion of the Feasibility Study (“FS”) into the Stage 1 development of the Bunyu Graphite Project. The Stage 1 development is based on a mining and processing plant annual throughput rate of 400,000 tonnes of ore to produce on average 23,700tpa of graphite products<sup>3</sup>. A key objective of the Stage 1 development is to establish infrastructure and market position in support of the development of the significantly larger Stage 2 expansion project at Bunyu.

The Guinea Gold Projects comprise 6 permits in Guinea, West Africa having a total area of 348km. The Projects are located in the prolific Siguirri Basin which forms part of the richly mineralised West African Birimian Gold Belt.
