

WIA GOLD

TRANSFORMATIONAL KOKOSEB GOLD DISCOVERY

MARCH 2024

ASX: **WIA**

Disclaimer

General Information and Disclaimer

This presentation has been prepared for the purposes of providing information to the recipient regarding Wia Gold Limited (**WiaGold** or the **Company**). It does not, and does not purport to, contain all the information that the recipient may require to evaluate the Company. It should be read in conjunction with WiaGold's other periodic and continuous disclosure announcements, which are available at www.asx.com.au.

No representation or warranty is given as to, and the recipient must not rely on, any information, statement or opinion contained in this presentation, or its accuracy, reasonableness or completeness. Except for statutory liability which cannot be excluded, each of WiaGold, its affiliates, directors, employees, advisers and agents expressly disclaims any responsibility for the accuracy or completeness of the material contained in this presentation and excludes all liability whatsoever for any loss or damage of any kind arising as a result of the use of, or reliance on, the information in this presentation.

This presentation does not take into account the investment objectives, financial situation or particular needs of any investor, potential investor or any other person. No investment decision should be made in reliance on this presentation. Independent financial and taxation advice should be sought before making any investment decision.

Forward Looking Statements

This presentation may contain certain forward looking statements and projections regarding: estimated, resources and reserves; planned production and operating costs profiles; planned capital requirements; and planned strategies and corporate objectives.

Forward-looking statements are subject to a variety of known unknown risks, uncertainties and other factors that could cause actual events or results to materially differ from those reflected

in the forward- looking statements, including, without limitation: inherent uncertainties and risks associated with mineral exploration; uncertainties related to the availability of future financing necessary to undertake activities on WiaGold's properties; uncertainties related to the possible recalculation of, or reduction in WiaGold's minerals resources; uncertainties related to the outcome of studies; uncertainties relating to fluctuations in gold prices; the risk that WiaGold's title to its properties could be challenged; risks related to WiaGold's ability to attract and retain qualified personnel, uncertainties related to general economic and global financial conditions; uncertainties related to the competitiveness of the industry; risk associated with WiaGold being subject to government regulation, including changes in regulation; risks associated with WiaGold being subject to environmental laws and regulations, including a change in regulation; risks associated with WiaGold's need for governmental licenses, permits and approvals; uninsured risks and hazards; risk related to the integration of businesses and assets acquired by WiaGold; risk associated with WiaGold having no history of earnings or production revenue; risks associated with fluctuation in foreign exchange rates; risks related to default by joint venture parties (if any), contractors and agents, inherent risks associated with litigation; risk associated with potential conflicts of interest; risk related to effecting service or process on directors resident in foreign countries; uncertainties related to WiaGold's limited operating history; risks related to WiaGold's lack of a dividend history; risks relating to short term investments; and uncertainties related to fluctuations in WiaGold's share price.

WiaGold's forward-looking statements are based on the assumptions, beliefs, expectations and opinions of management as of the date hereof and which WiaGold believes are reasonable in the circumstances, but no assurance can be given that these expectations will prove to be correct. These assumptions include but are not limited to that WiaGold's exploration of its properties and other activities will be in accordance with WiaGold's public statements and stated goals, that there will be no material adverse change affecting WiaGold or its properties, anticipated

costs and timing for WiaGold's activities and such other assumptions as set out herein.

Such forward looking statements/projections are estimates for discussion purposes only and should not be relied upon. They are not guarantees of future performance and involve known and unknown risks, uncertainties and other factors many of which are beyond the control of the Company.

The forward-looking statements/projections are inherently uncertain and may therefore differ materially from results ultimately achieved.

The Company does not make any representations, provides no warranties concerning the accuracy of the forward looking statements and disclaims any obligation to update or revise any forward-looking statements based on new information, future events or otherwise except to the extent required by applicable laws.

Mineral Resource Estimate

The information in this presentation that relates to the mineral resource estimate for the Kokoseb Project was reported in an announcement dated 15 May 2023. The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcement and that all material assumptions and technical parameters underpinning the mineral resource estimate in that announcement continue to apply and have not materially changed.

Previously Reported Results

There is information in this presentation relating to exploration results which were previously announced, the dates of which are referenced in the presentation. The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements.

Rapidly advancing the major Kokoseb gold discovery

Driving substantial value growth via the drill bit

Kokoseb Gold Project, Namibia

Maiden **Inferred MRE of 1.3 Moz at 1.0 g/t Au** (0.5 g/t cut-off) delivered at low US\$2/oz definition cost¹

Aggressive follow-up growth drilling set to deliver **substantial MRE uplift**, with four drill rigs active

Preliminary metallurgical test results deliver **+91% gold recoveries under conventional process**¹

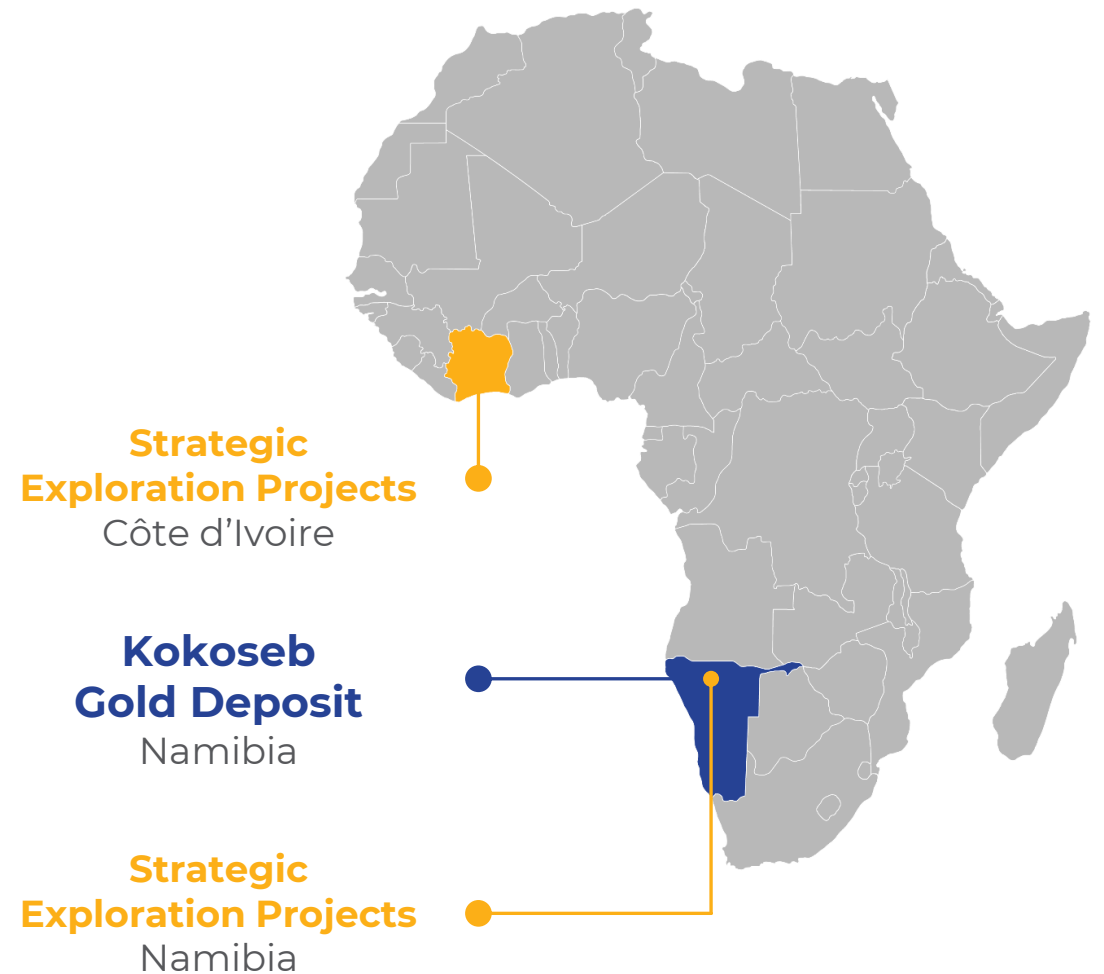

Stable jurisdiction with excellent infrastructure **attracting large new investment capital**

Strategic Exploration Project Pipeline

Côte d'Ivoire: Numerous drill ready targets identified across four permitted prospect areas
Namibia: Large greenfield land package in an under-explored mineralised belt

¹. Refer to ASX announcement 15 May 2023. WIA confirms that it is not aware of any new information or data that materially affects the information included in those releases. All material assumptions and technical parameters underpinning those releases continues to apply and has not materially changed.

Board and key management

Experienced leadership team with a track record of success

Andrew Pardey
Non-Executive Chair

Currently Managing Director at Predictive Discovery, Andrew has over 30 years' experience in exploration, project development and operations. He recently served as CEO of Centamin Plc (2015-19) and has held senior positions in Africa and Australia as part of Guinor Gold Corporation and Ashanti Goldfields, now AngloGold Ashanti. Andrew is a Non-Executive Director of ASX-listed Marvel Gold Ltd.

Steven Michael
Non-Executive Director

Steven is the Managing Director of Red Hawk Mining and is a senior corporate finance executive with 25+ years of experience in financial advisory, investment banking and senior executive leadership roles within ASX-listed exploration companies. His previous executive role was Managing Director of Vimy Resources. Steven is a Non-Executive Director of ASX-listed Predictive Discovery Ltd.

Mark Arnesen
Non-Executive Director

Mark is a Chartered Accountant with over 30 years' experience in the international resources industry and extensive expertise in the structuring and negotiation of finance for major resource projects. Mark has held executive roles with Billiton/Gencor, AngloGold Ashanti, Equinox Minerals Limited, Gulf Industrials Limited and Nzuri Copper Limited.

Chris Knee
Chief Financial Officer

Chris is a qualified accountant and has over 15 years' broad experience in a multinational chartered accounting firm and several senior finance roles across the resources industry with projects spanning Africa, Canada and Central Asia. Chris has a Bachelor of Commerce, Diploma of Accounting and is a Member of the Institute of Chartered Accountants.

Stuart McKenzie
Company Secretary

Stuart has over 25 years' experience in senior commercial roles across the resources industry. He was previously Company Secretary at Anvil Mining Ltd for six years. Prior to that he held senior positions with Ok Tedi Mining Limited, Ernst and Young and HSBC.

Pierrick Couderc
Exploration Manager

Pierrick has over 20 years' experience in a range of commodities and geological settings. Most recently, he served as the Côte d'Ivoire Exploration Manager for Centamin Plc. Notably, he led the team which discovered the 5.4Moz Doropo Project and the 2.2Moz ABC Project. Pierrick is a French national and fluent in both English and French.

Corporate snapshot

ASX: WIA

Capital Structure

Share price (A\$/share) ¹	0.072
Total shares on issue (M) ²	921
Options (M) ²	65
Market cap (A\$M, undiluted)	66.3
Cash (A\$M) ³	6.9
Debt (A\$M) ³	Nil

1. At 19 March 2024
2. At 22 August 2023, 65 million options have various strikes and expiries
3. At 31 December 2023

Register Composition

Transformational Kokoseb gold discovery

Delivered just eleven months from discovery hole

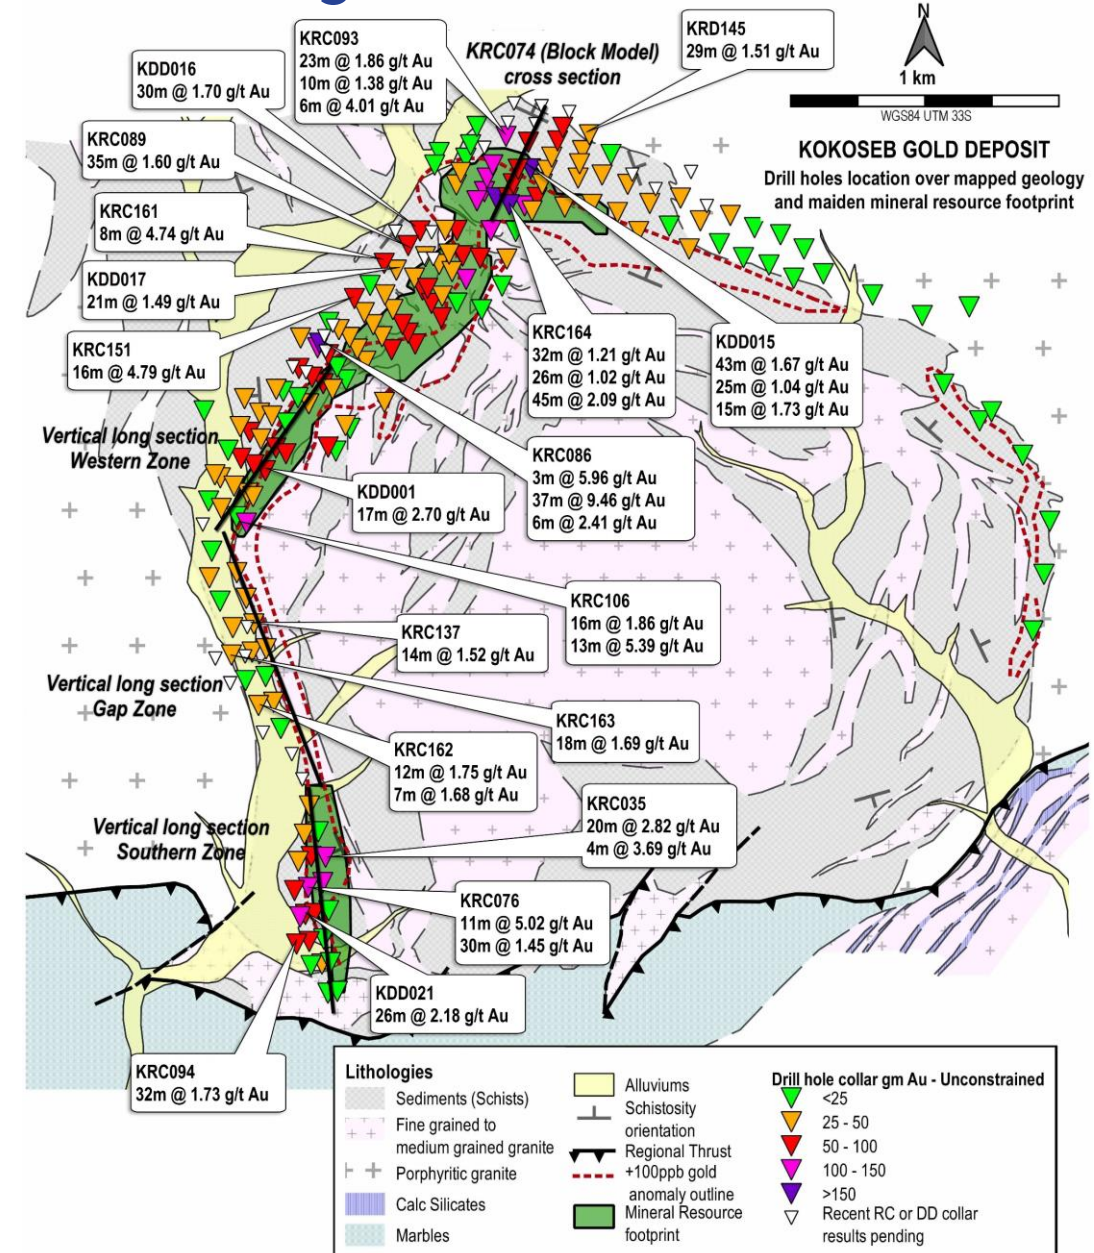

Inferred Mineral Resource Estimate

1.3 Moz at 1.0 g/t Au
at 0.5 g/t cut-off¹

- Maiden MRE includes higher-grade 0.72 Moz at 1.5 g/t Au (at 1.0 g/t cut-off)
- MRE informed by 12 diamond and 90 RC holes, totalling 19,496m, plus data from 10 trenches for 1,058m
- Discovery and definition cost of only US\$2/oz

1. Refer to Appendix A and ASX announcement 15 May 2023. WIA confirms that it is not aware of any new information or data that materially affects the information included in those releases. All material assumptions and technical parameters underpinning those releases continues to apply and has not materially changed.

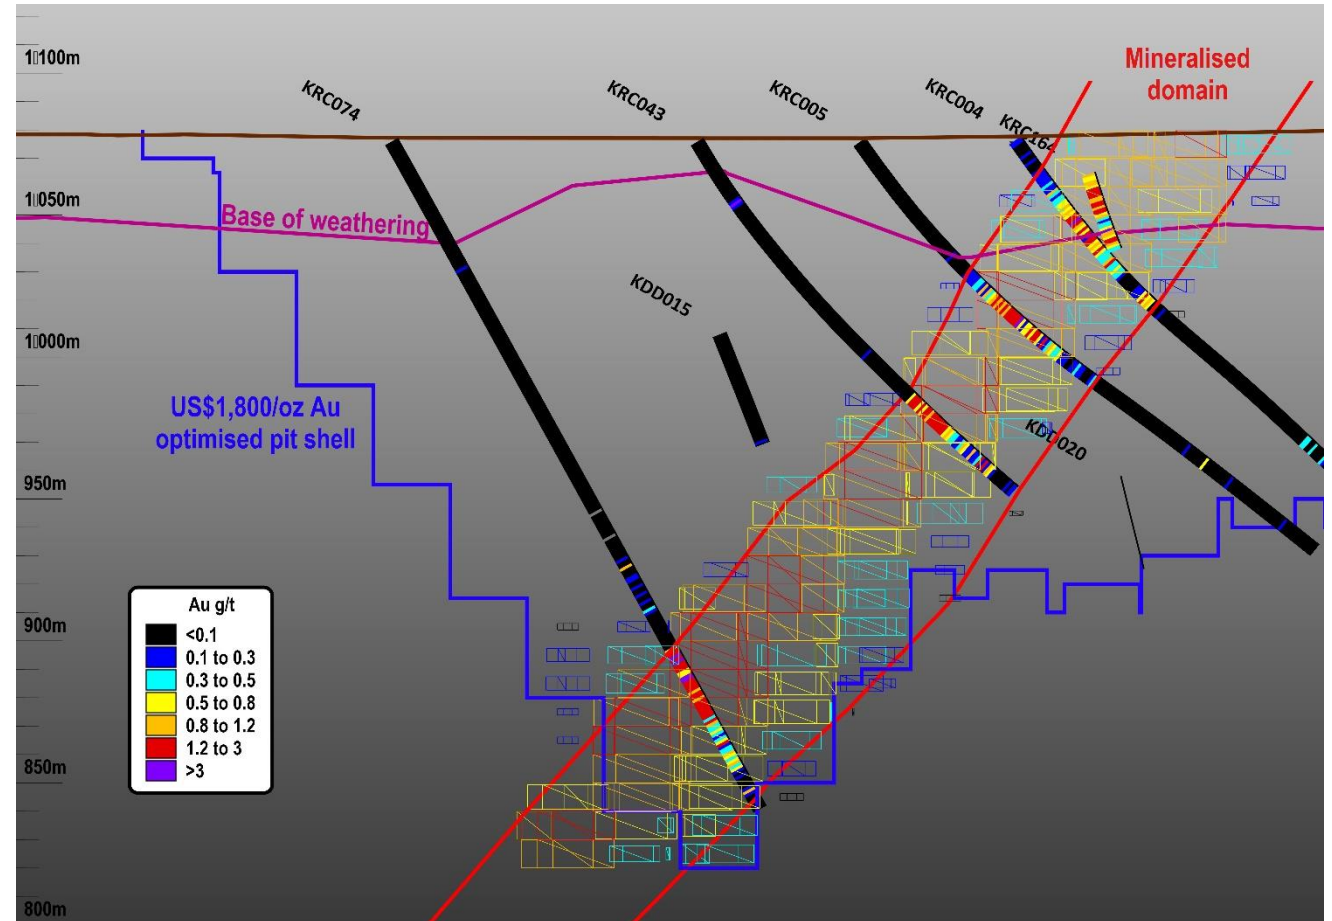

2. See ASX announcements dated 7 June 2022, 14 December 2022, 15 May 2023, 29 May 2023, 10 July 2023, 13 December 2023, 5 February 2024 and 12 March 2024 for further information on the drilling results shown on the map.

Readily open-pittable gold mineralisation

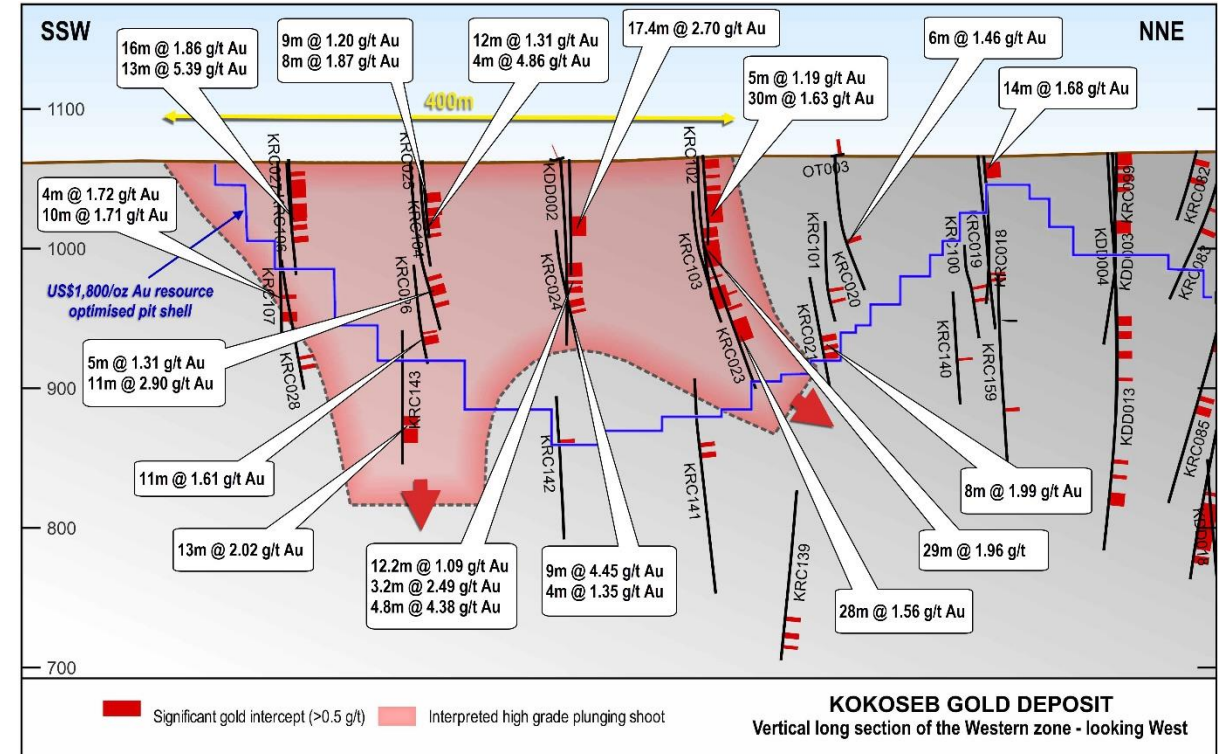

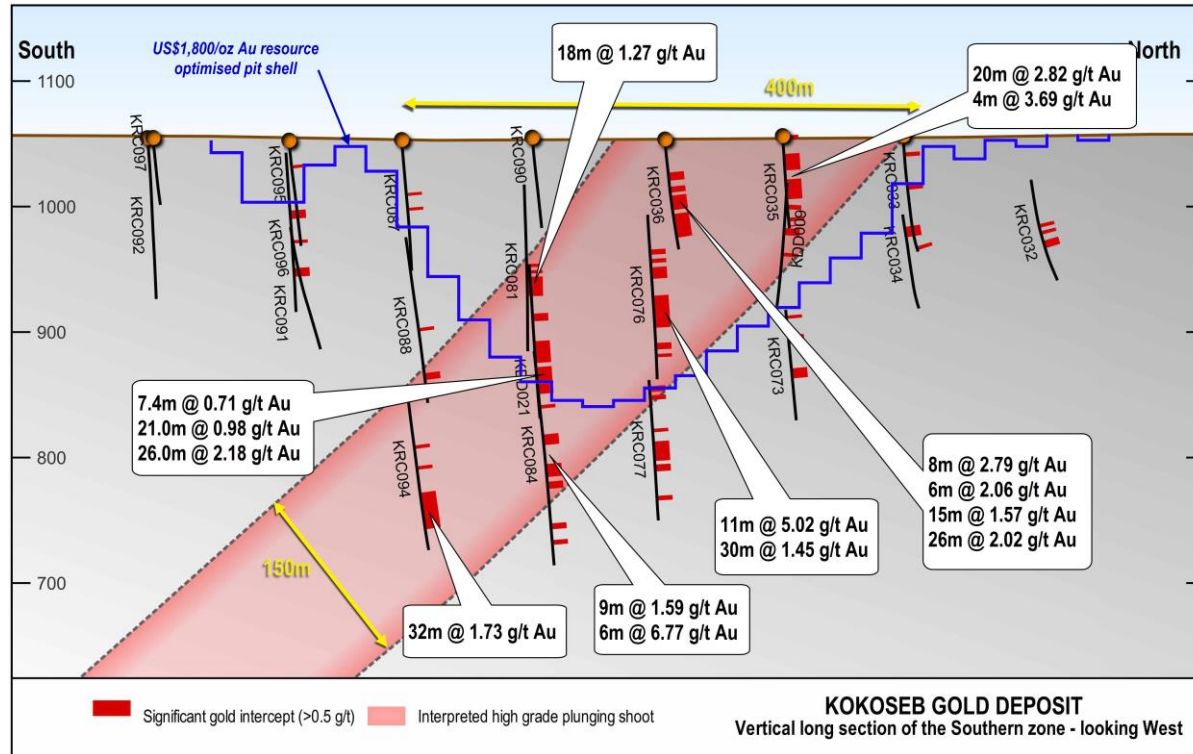

Plus-90% gold recoveries under conventional process coupled with solid MIK MRE

- MRE covers cumulative 2.9km strike and maximum depth of approx. 290m (limited only by current drilling)
- Outcropping mineralisation, with max. of 2m cover
- Average weathering depth of ~30m
- **Preliminary met testwork returned gold recoveries of 91.37% and 91.35%¹**
- Complete sample leach testing, target grind of P80 75µm followed by gravity recovery and direct cyanidation leach
- Leach kinetics were rapid with majority of gold leaching in 2 - 4 hours

¹. Refer to Appendix A and C, and ASX announcement 15 May 2023. WIA confirms that it is not aware of any new information or data that materially affects the information included in those releases. All material assumptions and technical parameters underpinning those releases continues to apply and has not materially changed.

Southern and Western Zones in long section

- Coherent mineralised shoots repeating along strike, e.g. Southern¹ and Western Zones²
- Mineralisation wide open along strike and at depth

1. Results from the Southern Zone, refer to ASX announcements dated 17 August 2022, 14 December 2022, 15 May 2023, 29 May 2023 and 12 March 2024

2. Results from the Western Zone, refer to ASX announcements dated 7 June 2022, 27 July 2022, 14 December 2022, 15 May 2023, 10 July 2023 and 13 December 2023

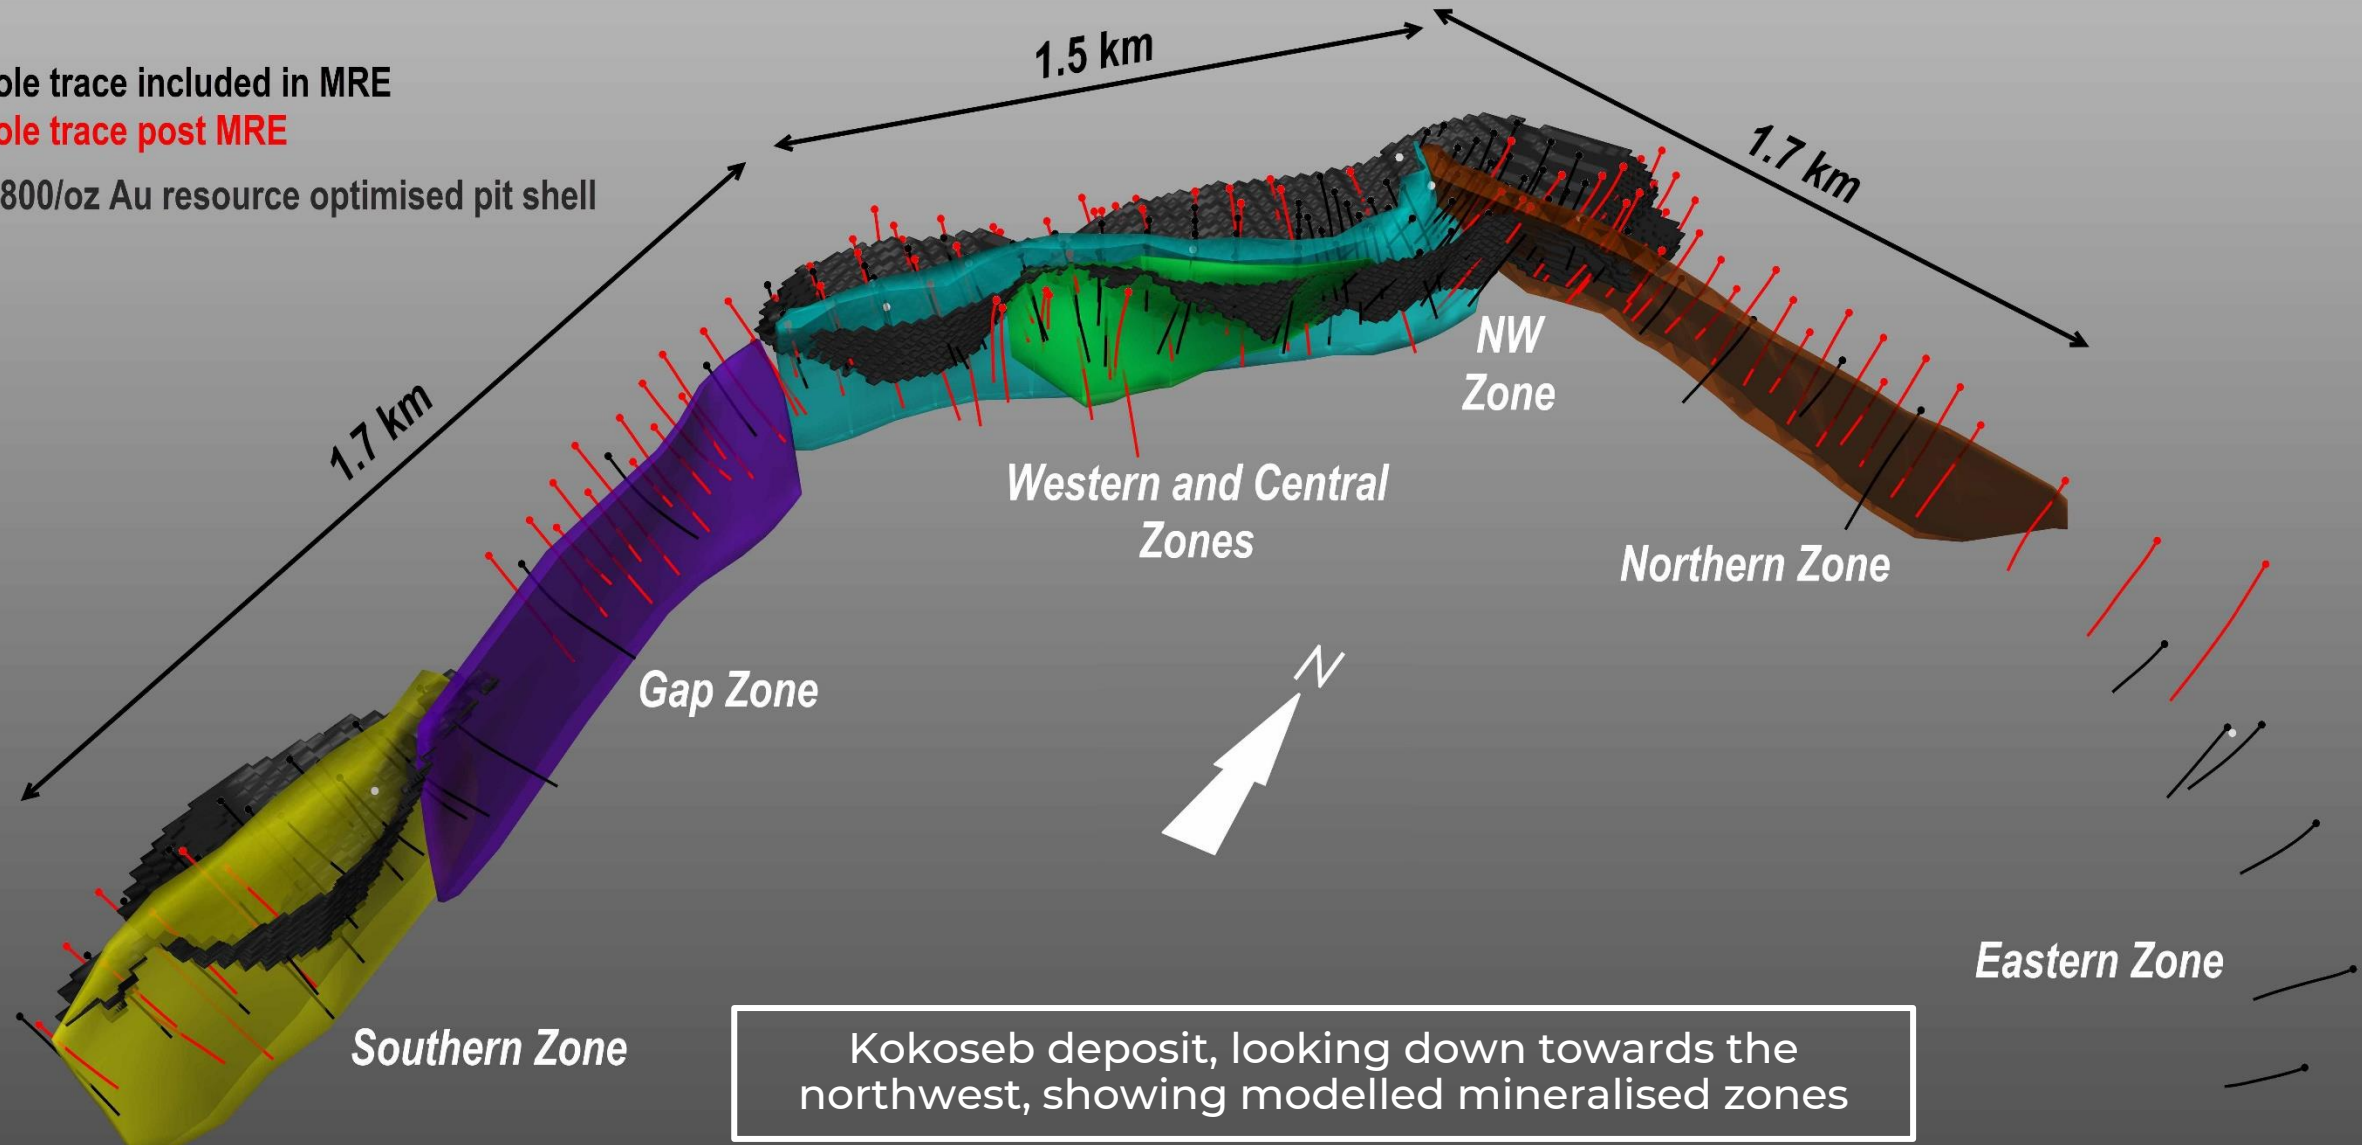

Continuous mineralisation now defined over 4.9km strike

Post-MRE drilling substantially grown mineralised footprint

Drillhole trace included in MRE

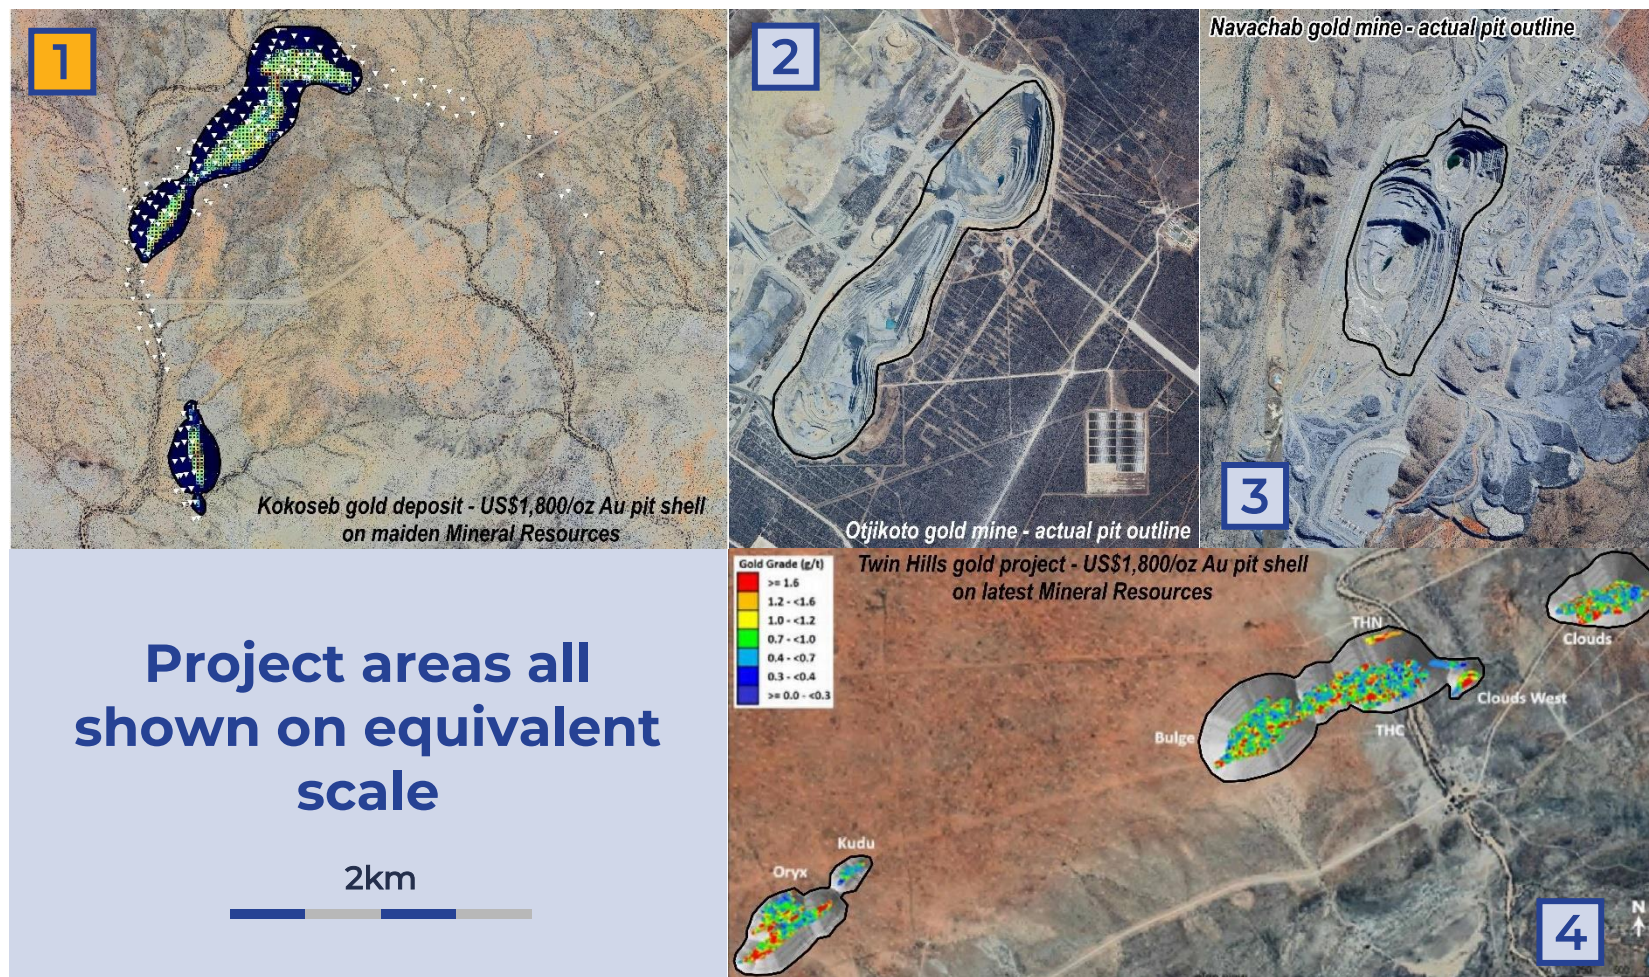

Drillhole trace post MRE

US\$1,800/oz Au resource optimised pit shell

A very large mineralised system

Kokoseb footprint comparable to major Namibian operating gold mines and projects

1 Kokoseb Gold Deposit:
1.3 Moz at 1.0 g/t Au
(at 0.5 g/t cut-off)¹

2 Otjikoto Gold Mine:
1.4 Moz at 1.5 g/t Au
(at 0.4 g/t cut-off, within a US\$1,350/oz Au pit shell)²

3 Navachab Gold Mine:
3.9 Moz Au
(as at 31 December 2013)³

4 Twin Hills Gold Project:
3.1 Moz at 1.1 g/t
(at 0.3 g/t cut-off)⁴

1. ASX announcement 15 May 2023.

2. Refer to NI 43-101 Technical Report – Feasibility Study, dated February 25, 2013, from B2Gold

3. Refer to https://www.sec.gov/Archives/edgar/data/1067428/000120561314000094/aga_sale.pdf (retrieved 29 January 2024)

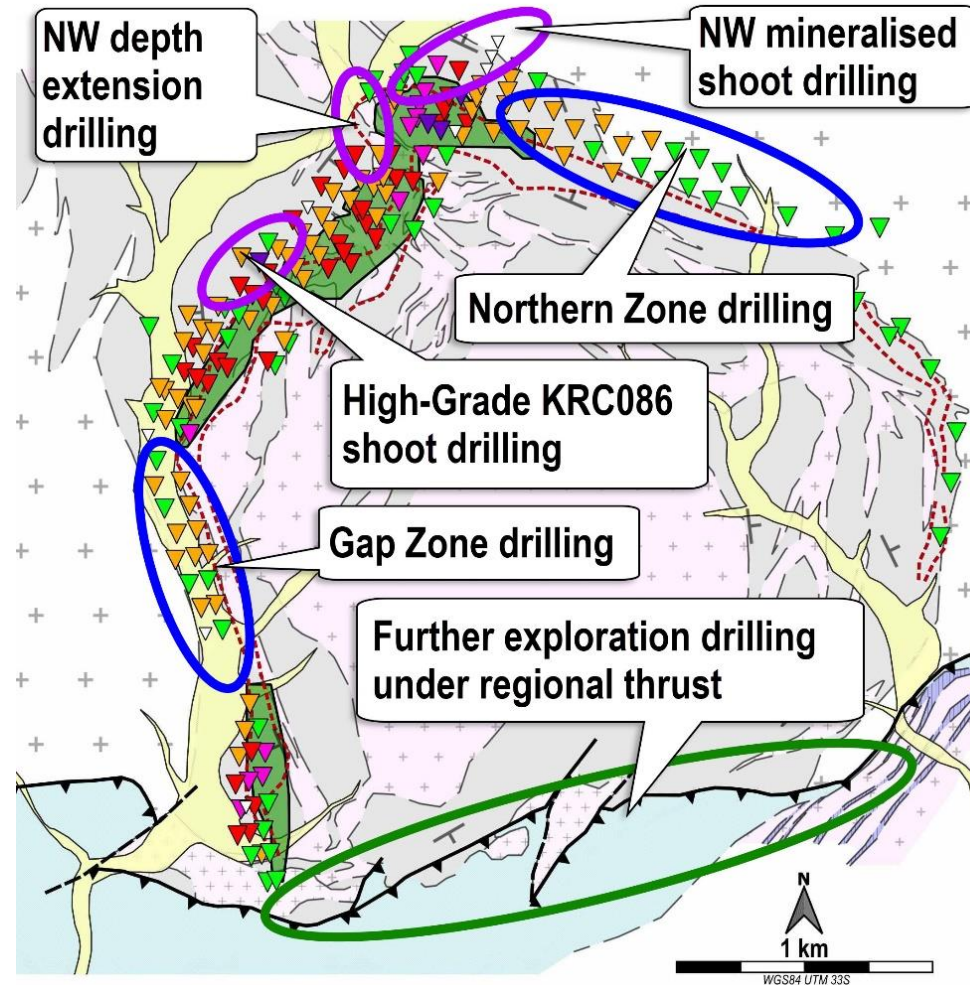

4. Refer <https://osinoresources.com/projects/twin-hills-discovery/> (retrieved 29 January 2024)

Ongoing growth drilling to drive substantial MRE uplift

Rapidly uncovering scale extent of Kokoseb, wide open along strike and at depth

- Four drill rigs active at site, two diamond and two RC
- Targeting substantial MRE increase during Q2 2024
- Major growth via shallow strike extension success in Northern and Gap Zones
- Significant depth potential at high-grade zone near KRC086 (37m at 9.46 g/t Au from 291m)¹ and within NW Zone shoots
- Drilling 20,641m completed since MRE, including 13 diamond holes and 69 RC holes
- Further metallurgical test work on core samples (incl. oxide, low-grade, medium-grade and deep fresh material); results expected H2 2024

1. Refer to ASX announcements 29 May 2023 and 10 July 2023..

Extensional drilling success at the Gap Zone

Mineralised strike of 1,000 meters to be added in next Mineral Resource update

- Gap Zone and Northern Zone were not included in the MRE due to wide spaced drilling at the time
- Extensional drilling underway returns better results than initially expected
- Several strongly mineralised shoots are highlighted, completely open at depth
- Latest significant intercepts include¹:
 - 18m at 1.69 g/t Au
 - 12m at 1.75 g/t Au
 - 10m at 1.44 g/t Au

1. Refer to ASX announcement 5 February 2024 for latest results – labelled in red on the long section above; intercepts in black on the map were previously reported.

Namibia is a well-recognised mining jurisdiction

Mining represents 10% of Namibian GDP and is its leading economic sector¹

**Long established
mining history**

Significant producer of
uranium, diamonds,
gold and base metals

**Excellent
infrastructure**

Benefiting from
access to modern
port, rail and power

**Recognised local
asset value**

Twin Hills gold project
acquisition in Feb
2024 for C\$368M²

**Politically
stable**

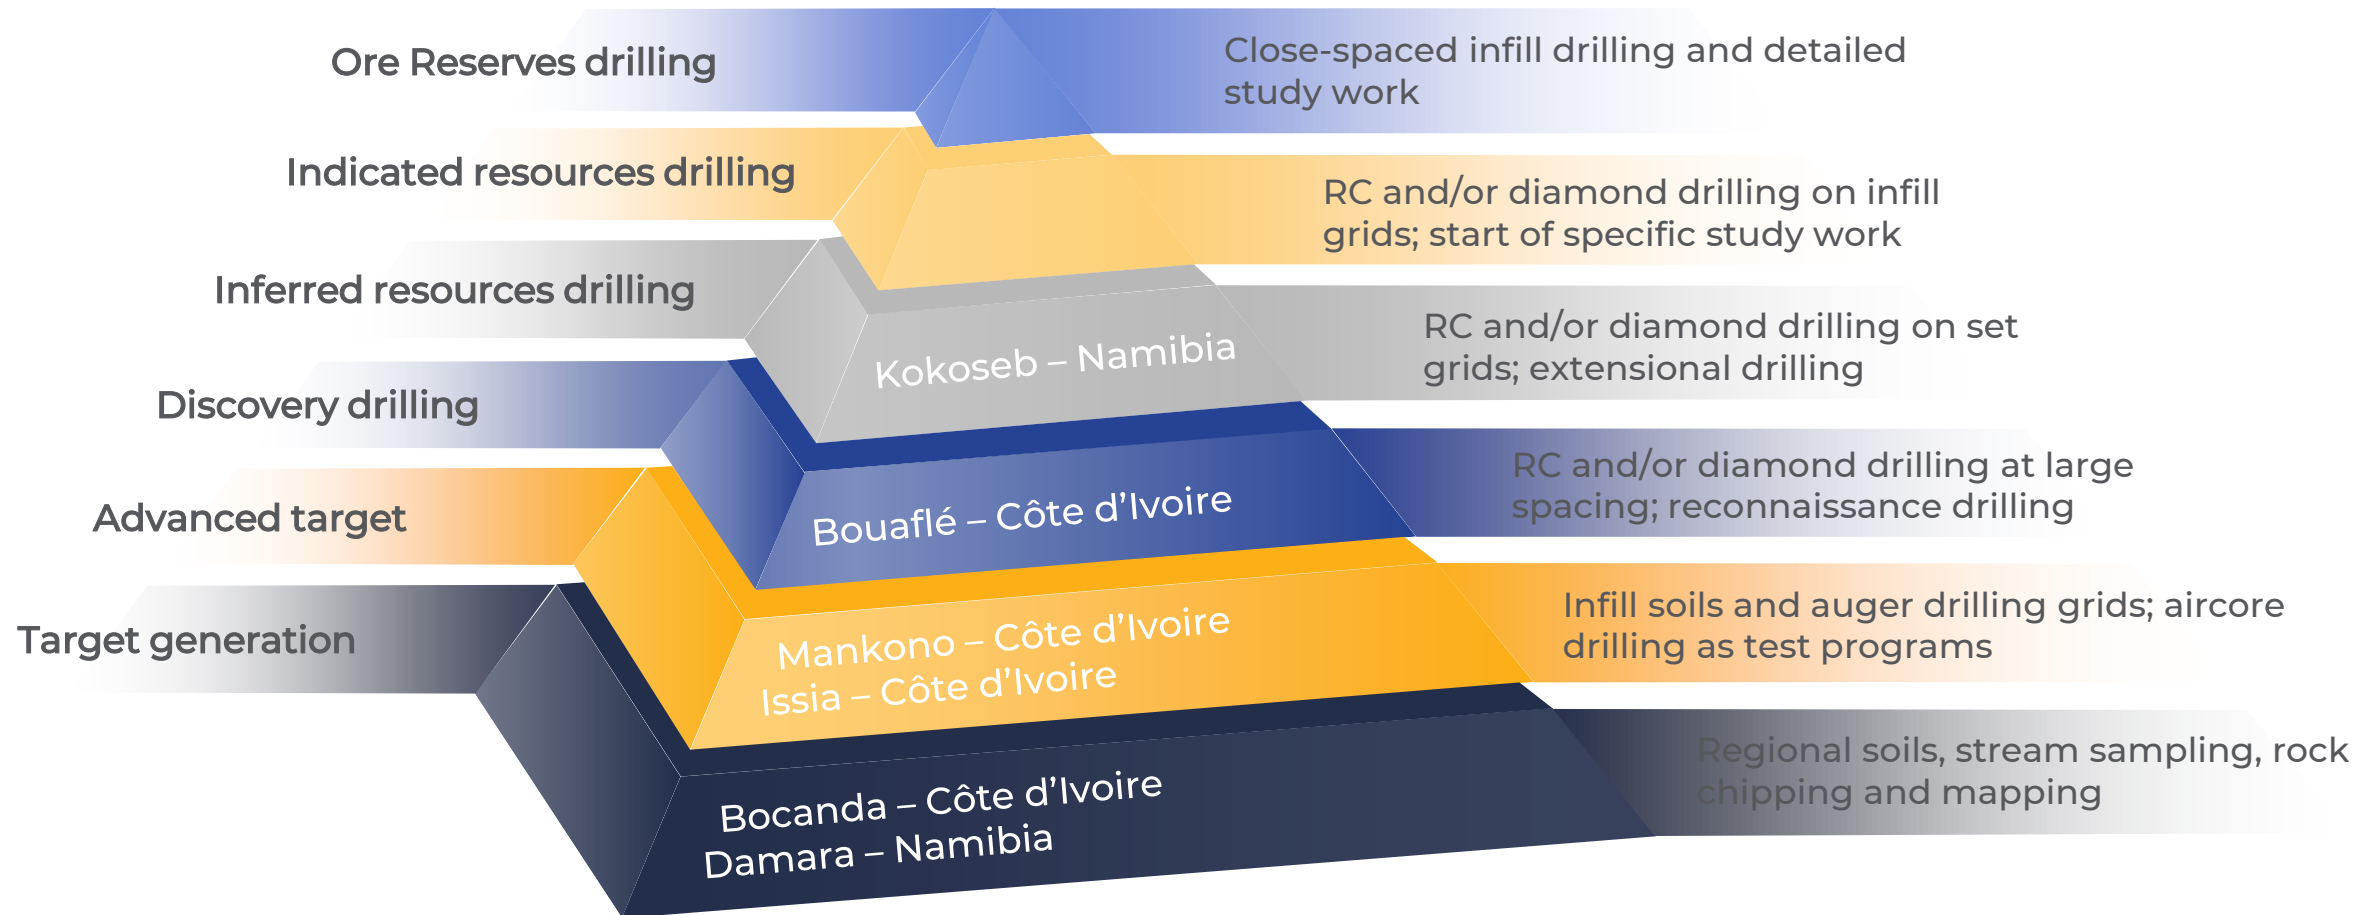

Strong rule of law and
clear, transparent
mining code

1. Source: <https://www.trade.gov/country-commercial-guides/namibia-mining-and-minerals>, retrieved 12 January 2024

2. Yintai Gold agreed terms to acquire Osino Resources (including the flagship Twin Hills gold project) for C\$368 million cash, with completion expected H1 2024

Strategic exploration pipeline

A portfolio of high-quality projects at various stages on the advancement horizon

Côte d'Ivoire project portfolio

Strategically located blocks

A. Mankono Project

Mankono Quest permit granted, five additional permits under application. **Two extensive gold anomalies defined**¹

B. Bouaflé Project

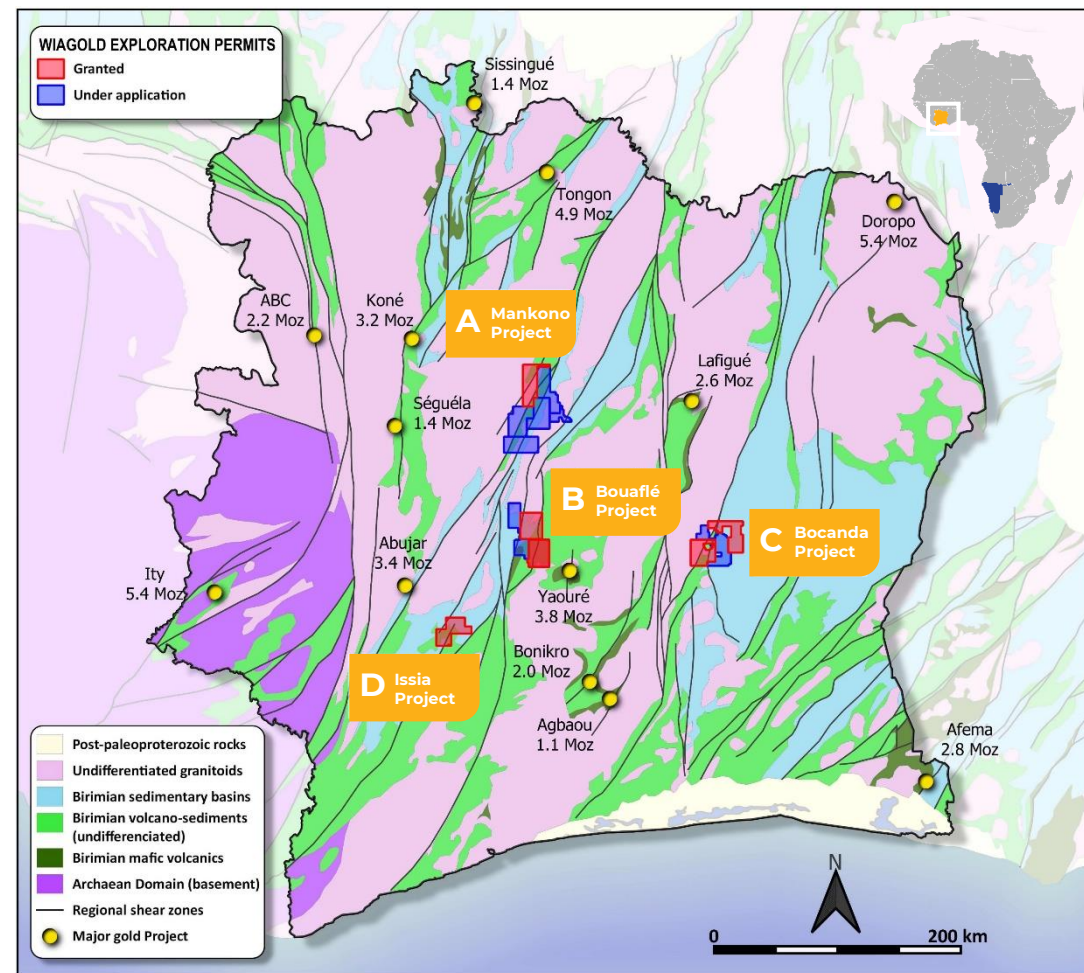

Bouaflé Sud and Bouaflé Nord permits granted, plus additional application. **Significant +17km mineralised shear zone in Bouaflé Sud**², historically underexplored

C. Bocanda Project

Bocanda Nord, Bocanda permit granted. Initial stream sediment sampling across granted permits **identified three large gold targets for follow-up work**³

D. Issia Project

Issia permit granted, plus additional application. **Surface sampling** (soils, gold and multi element assays) **underway**

1. ASX announcements 21 September 2021 and 23 November 2021

2. ASX announcement 17 November 2020

3. ASX announcement 30 August 2021

A story of significant exploration success

Multiple gold mineralised trends identified at Issia and Bouaflé

BOUAFLE GOLD PROJECT

Significant gold mineralised trends identified by exploration work and historical results

+1km strike mineralised trend identified from aircore and auger results combined with historical exploration results

11m @ 2.20 g/t Au Significant aircore intercept previously reported

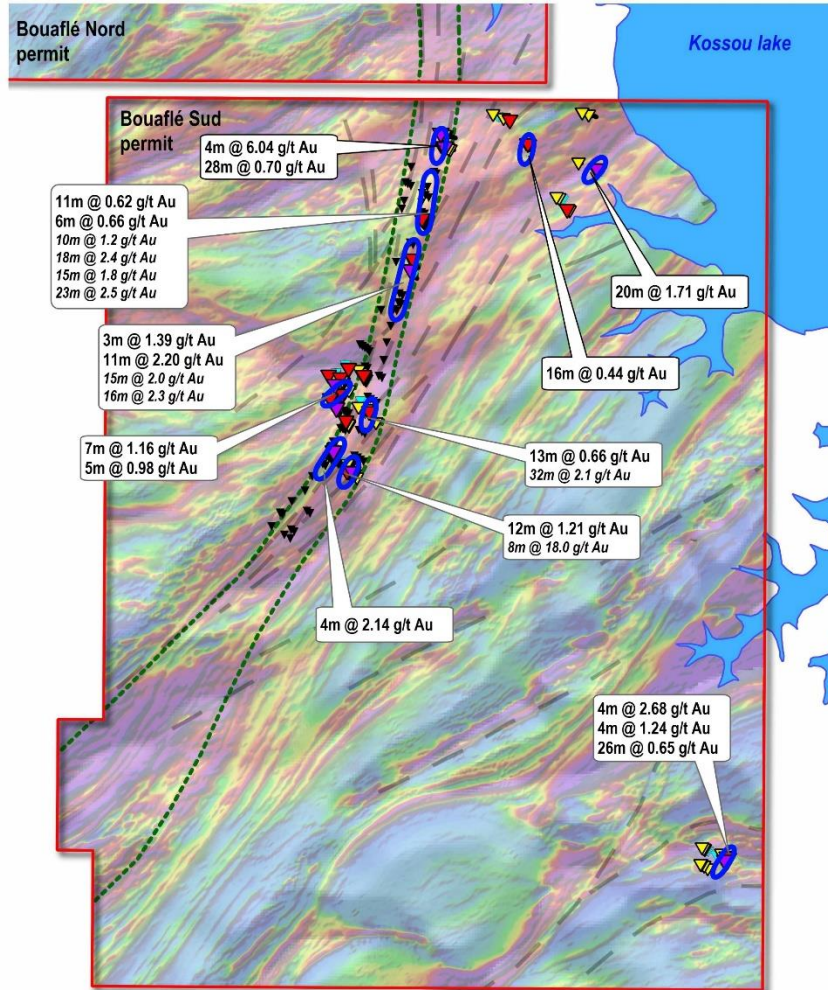

15m @ 2.0 g/t Au Significant historical RC intercept

Gold Gram x Meter in aircore hole

- <1
- 1 to 2
- 2 to 5
- 5 to 15
- >15

Historical drill hole collar

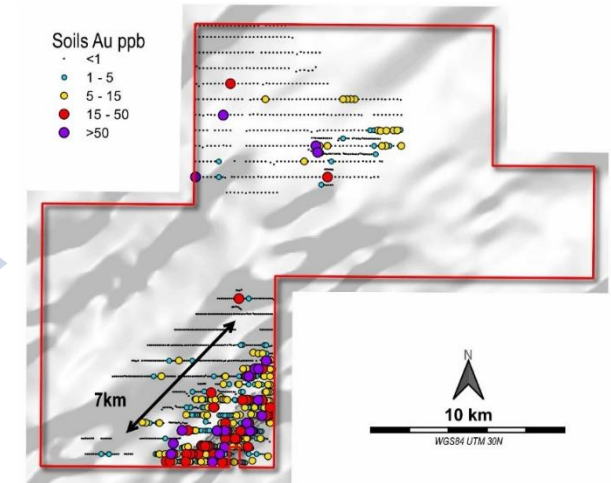

Mineralised shear corridor

Significant air core drilling intercepts at the **Bouaflé Project** included:

- 12m at 1.21 g/t Au¹
- 7m at 1.16 g/t Au¹
- 9m at 2.63 g/t Au¹
- 20m at 1.71 g/t Au²
- 4m at 6.04 g/t Au²

New 7km-long strongly anomalous corridor delineated from soil sampling program at the **Issia Project**

1. Refer ASX announcements dated 29 September 2022 and 22 January 2024 for information on the results shown for the Bouaflé Project.
2. Refer ASX announcement dated 8 November 2023 for information on the results shown for the Issia Project.

WIA**GOLD**

INVESTMENT HIGHLIGHTS

WIA: ASX

Transformational
Kokoseb gold
discovery

Maiden MRE 1.3 Moz
at 1.0 g/t Au with
super low US\$2/oz
definition cost

Growth drilling to
drive substantial
targeted MRE uplift

Aggressive further
growth drilling
delivering strike and
depth success

Straightforward
metallurgy and
process route

Preliminary met
testwork delivers
over 91% gold
recoveries

Established, well
recognised mining
jurisdiction

Stable jurisdiction,
excellent infrastructure
attracting significant
investment capital

Strategic
exploration
project pipeline

Four permitted
prospect areas in
Côte d'Ivoire with
drill-ready targets

Appendix A

Kokoseb MRE

Cut off (Au g/t)	Tonnes (Mt)	Au (g/t)	Au (Moz)
0.10	100	0.57	1.8
0.20	76	0.69	1.7
0.30	63	0.79	1.6
0.40	51	0.89	1.5
0.50	41	1.0	1.3
0.60	34	1.1	1.2
0.70	28	1.2	1.1
0.80	23	1.3	0.96
0.90	18	1.4	0.81
1.00	15	1.5	0.72

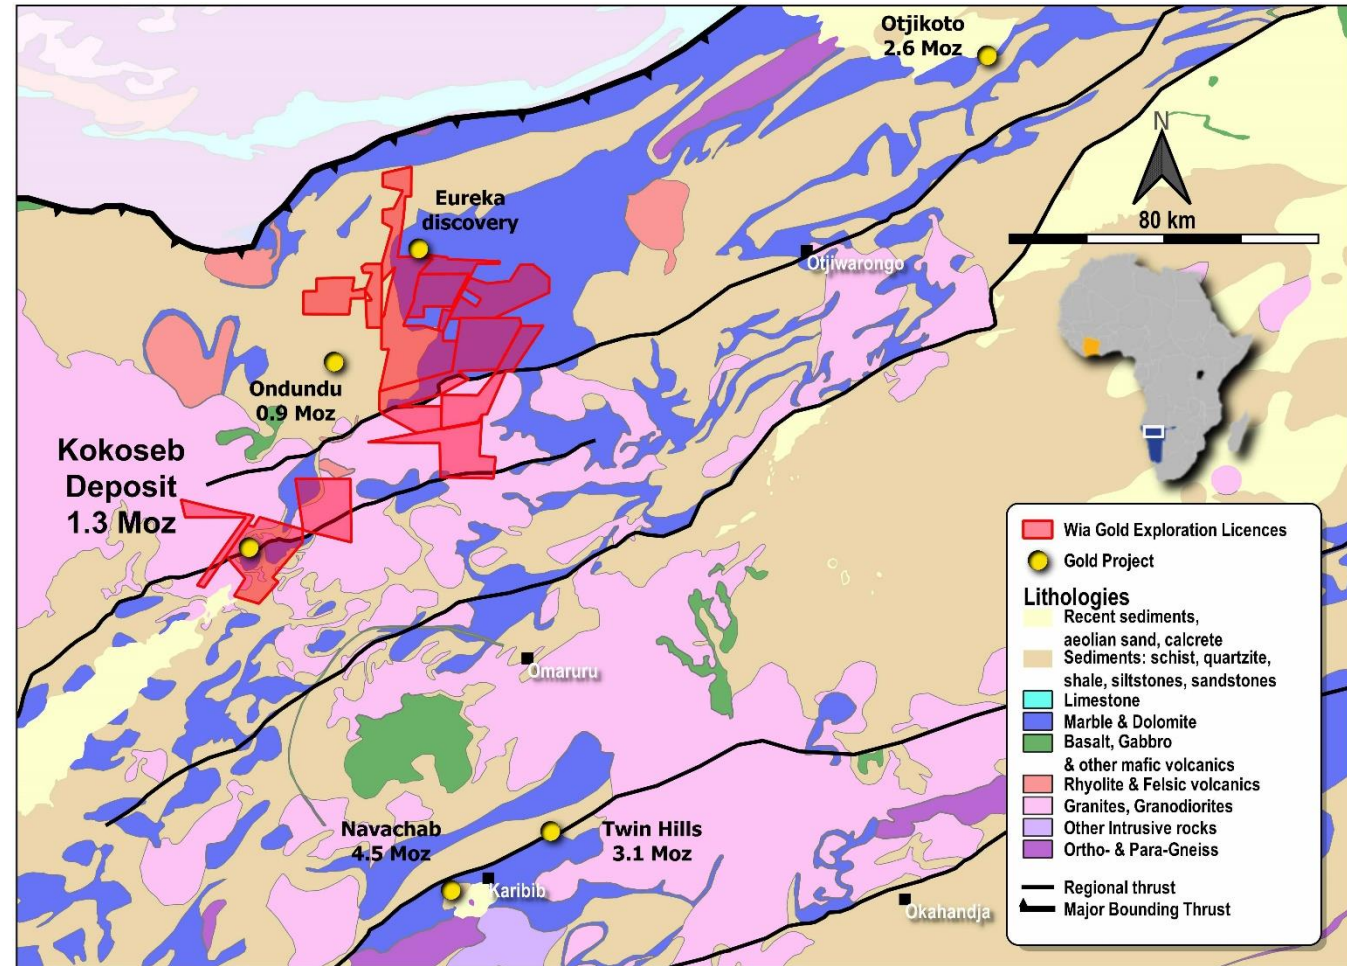

1. Refer to ASX announcement 15 May 2023. WIA confirms that it is not aware of any new information or data that materially affects the information included in those releases. All material assumptions and technical parameters underpinning those releases continues to apply and has not materially changed.

Appendix B

Under explored gold belt in Namibia

- Located in northwest Namibia, 320km by road from the capital Windhoek
- Deposit resides in Okombahe exploration licence (WIA 80%), a JV with state-owned mining company, Epangelo
- Okombahe licence is part of WIA's large Damaran Project of 12 tenements totalling more than 2,700km²
- Mineralisation hosted by the Kuiseb Formation (same as Twin Hills deposit)
- Metasediments as biotite-schist extensively intruded by both late syn-tectonic and post tectonic granites

1. 27 October 2022 (Osino Resources): <https://osinoresources.com/news/>

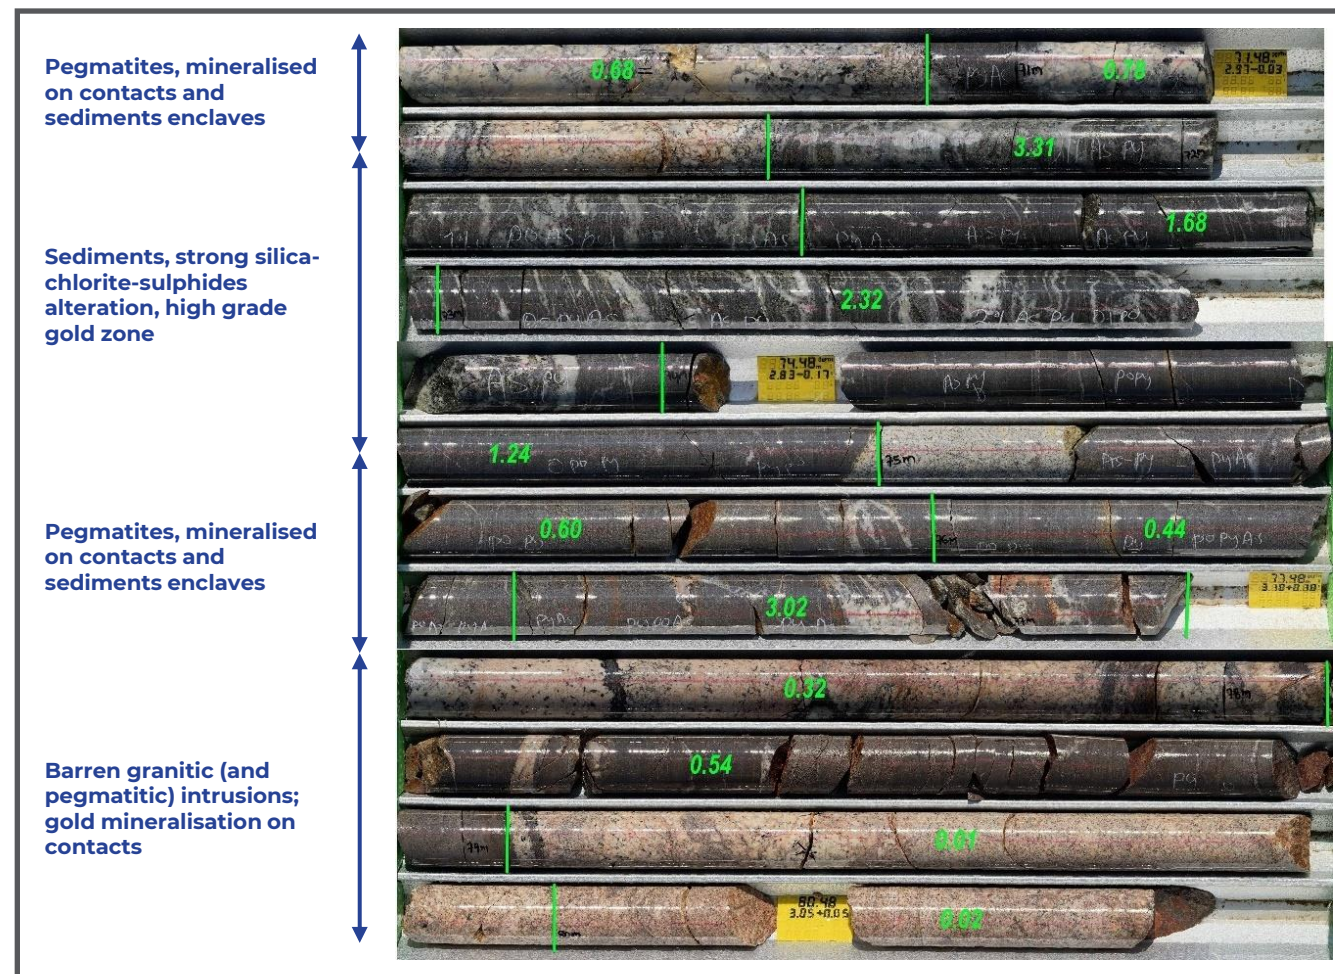

2. 10 July 2020 (B2Gold): <https://www.b2gold.com/projects/reserves-resources/>

Appendix C

Straightforward metallurgy and process

- Preliminary metallurgical test work completed on two samples composited from RC bulk samples in fresh sulphide material¹
- **Gold recoveries of 91.37% and 91.35%**
- Complete sample leach testing, target grind of P80 75µm followed by gravity recovery and direct cyanidation leaching
- Leach kinetics were rapid with majority of gold leaching in 2 to 4 hours
- Further metallurgical test work to be conducted on core samples on oxide, low-grade, medium-grade and deep fresh material, **with results expected H2 2024**

1. ASX announcement 15 May 2023

KDD012: drill core from 70.5m to 80.5m depth; typical geological settings and mineralisation style; gold grades in g/t. Refer ASX announcement 17 August 2022 for information on drillhole KDD012

Appendix D

Namibian Assets Joint Venture Terms

Joint Venture Parties

Epangelo Mining Company (includes the Kokoseb Gold Discovery) and Kongom Group¹

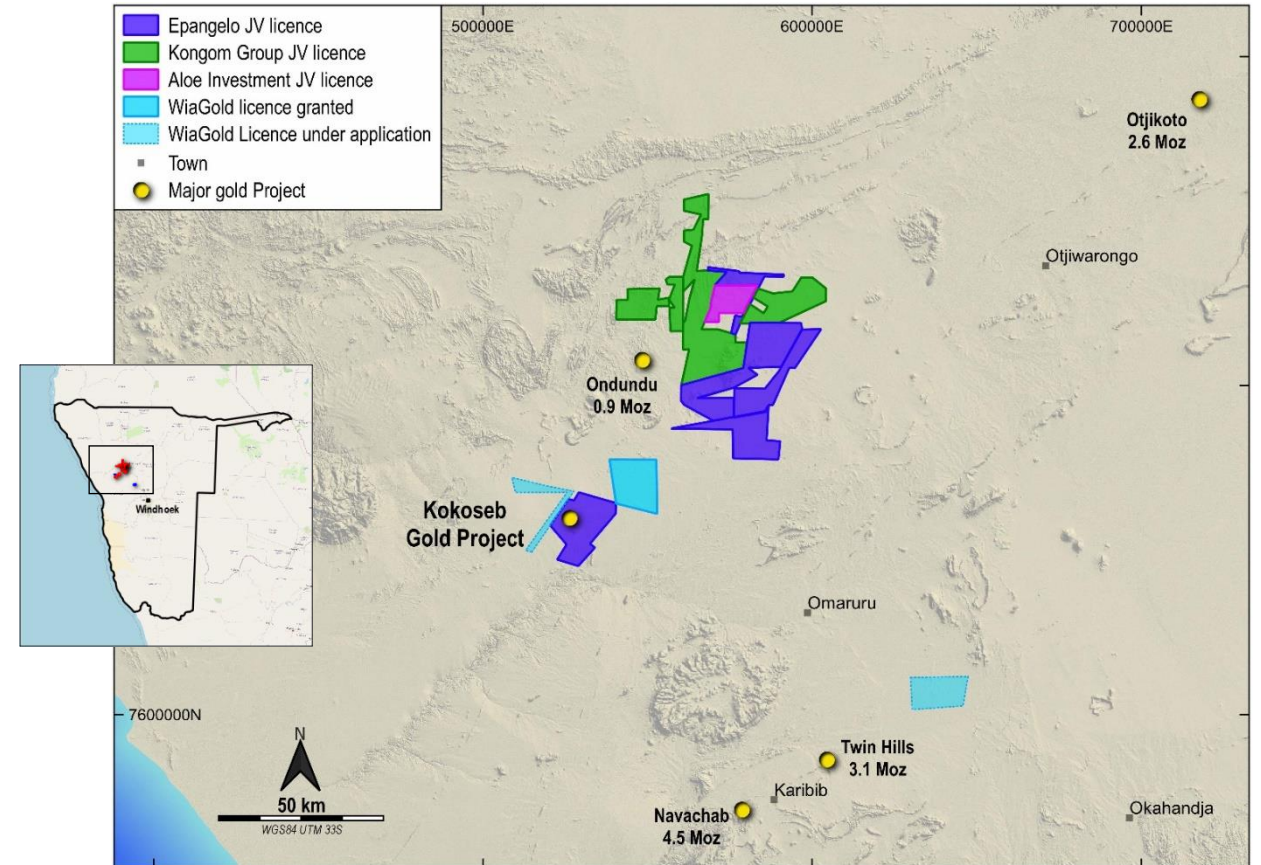

Stage 1 and Stage 2 (complete)

WIA earns 80% interest in Epangelo Licences

Stage 3

Minorities free carried to DFS (Epangelo) or Decision to Mine (Kongom)

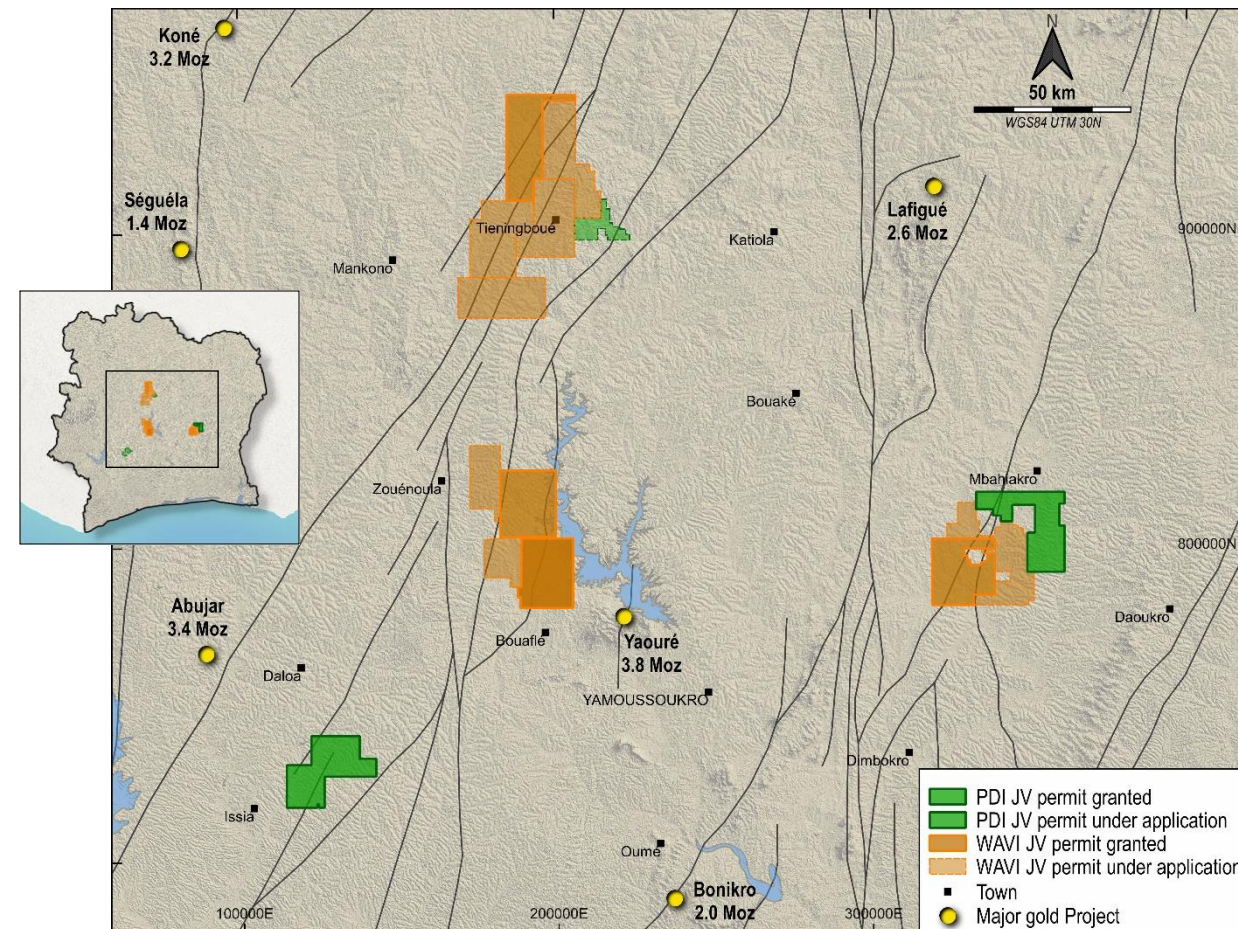

1. Epangelo is a private mining company incorporated into the Republic of Namibia under the Companies Act (Act 61 of 1972). The Government of the Republic of Namibia is the sole shareholder. The company was declared as a state-owned enterprise in 2013 under the PEGA (Act 2 of 2006)

Appendix E

Côte d'Ivoire Joint Venture Terms

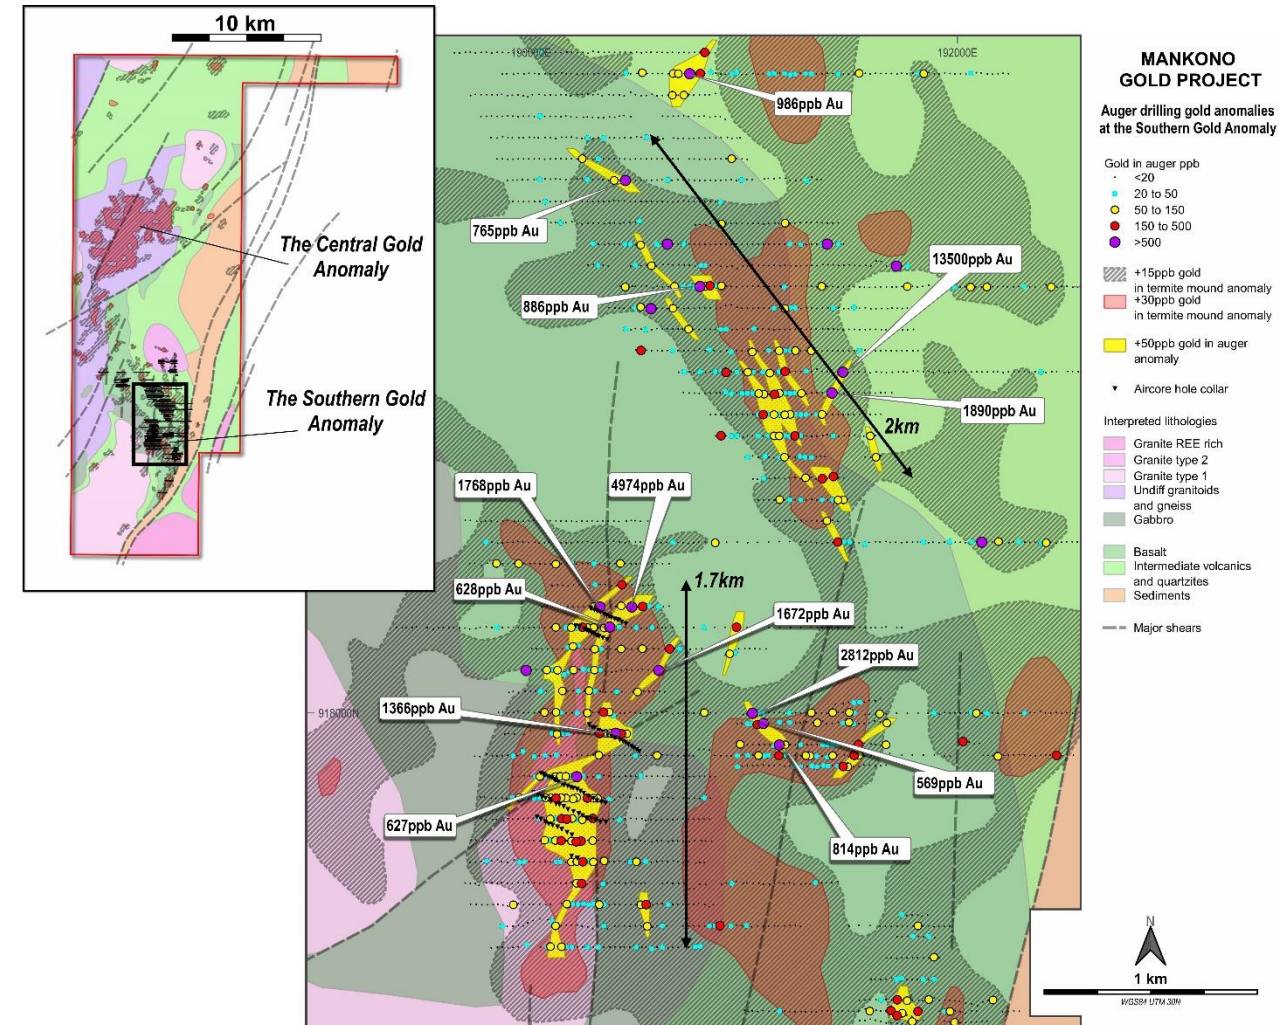

Joint Venture Parties	Predictive Discovery (ASX:PDI) and West African Venture Investments (WAVI)
Stage payments	A\$150k upon granting of exploration licences
Stage 1	Earn 80% Joint Venture interest by meeting minimum expenditure commitments on licences for 12 months
Stage 2	Continue sole funding JV until Pre-Feasibility Study (PFS) and granting of Mining Lease
Stage 3	Minority shareholder to contribute or dilute (standard dilution formula)
Minimum Joint Venture interest	If Joint Venture interest falls below 10%, convert to 2% NSR

Appendix F

Mankono Project, Côte d'Ivoire

- **Mankono Quest permit granted**, five additional permits under application
- Area encompasses several major regional shears of the Banfora-Dalona greenstone belt **over >75km of strike**
- Along strike of the Abuhar gold Project and (Tietto Minerals) and the Napié gold Project (Mako Gold)
- **Two extensive gold anomalies defined¹**
- First set of auger infill results returned a north-south 1.7km striking, 250m wide, strong and coherent gold anomaly which includes peak values up to 4.97 g/t Au²
- Favourable geological context, a contact zone between the mafic volcanics and a granite

1. ASX announcements 21 September 2021 and 23 November 2021
2. ASX announcement 07 February 2023

Appendix G

Bouaflé Project, Côte d'Ivoire

- **Bouaflé Sud and Bouaflé Nord permits granted**, with one additional under application
- Bouaflé Sud is located 35km from the Yaouré gold mine (1.6Moz at 1.8 g/t gold¹, Perseus)
- **Significant +17km mineralised shear zone** in Bouaflé Sud¹, historically underexplored
- Several large surface gold anomalies tested in recent exploration program consisting of 142 AC drill holes for 5,582m, with key mineralised intercepts that included²:
 - **20m at 1.71 g/t Au from 16m in BFAC0318**
 - **4m at 6.04 g/t Au from 10m in BFAC0283**
 - **28m at 0.70 g/t Au from 22m in BFAC0254**
- Ten strong mineralised trends of +1km strike each now identified, with planning underway for follow-up drill programs to test these areas.

BOUAFLE GOLD PROJECT

Significant gold mineralised trends identified by exploration work and historical results

+1km strike mineralised trend identified from aircore and auger results combined with historical exploration results

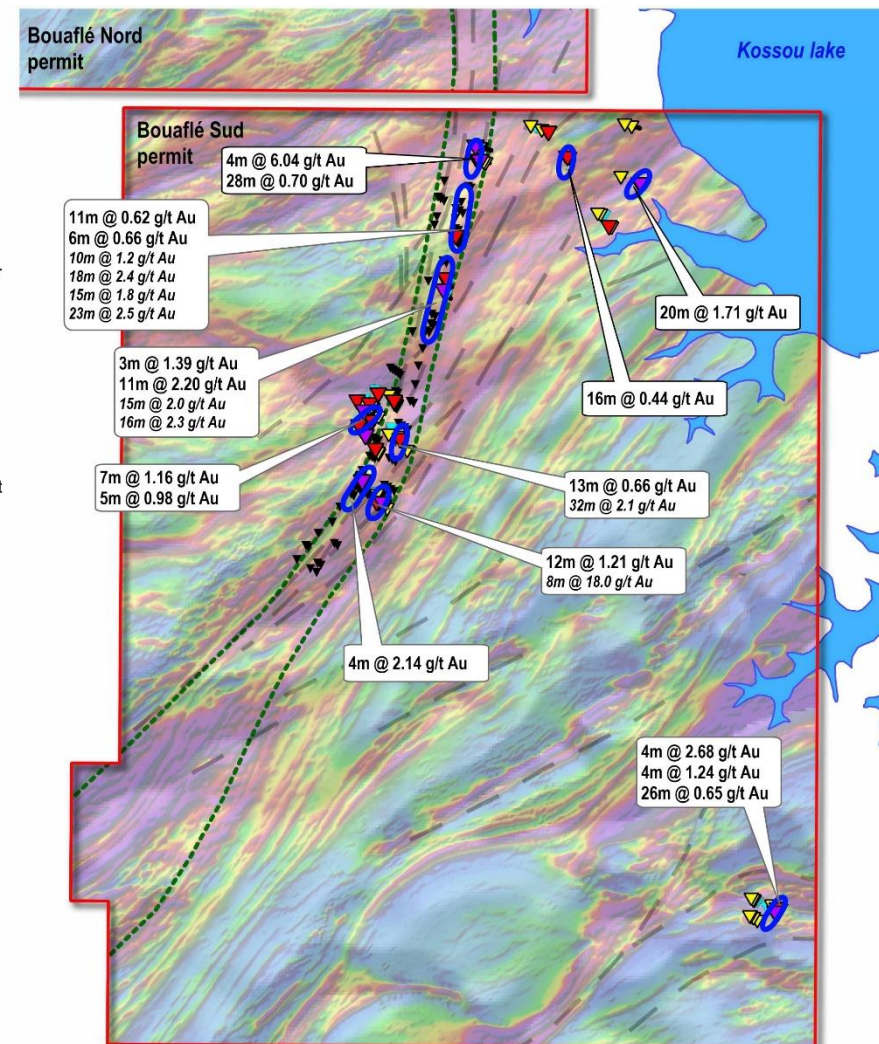

11m @ 2.20 g/t Au Significant aircore intercept previously reported
15m @ 2.0 g/t Au Significant historical RC intercept

Gold Gram x Meter in aircore hole

▼ Historical drill hole collar

--- Mineralised shear corridor

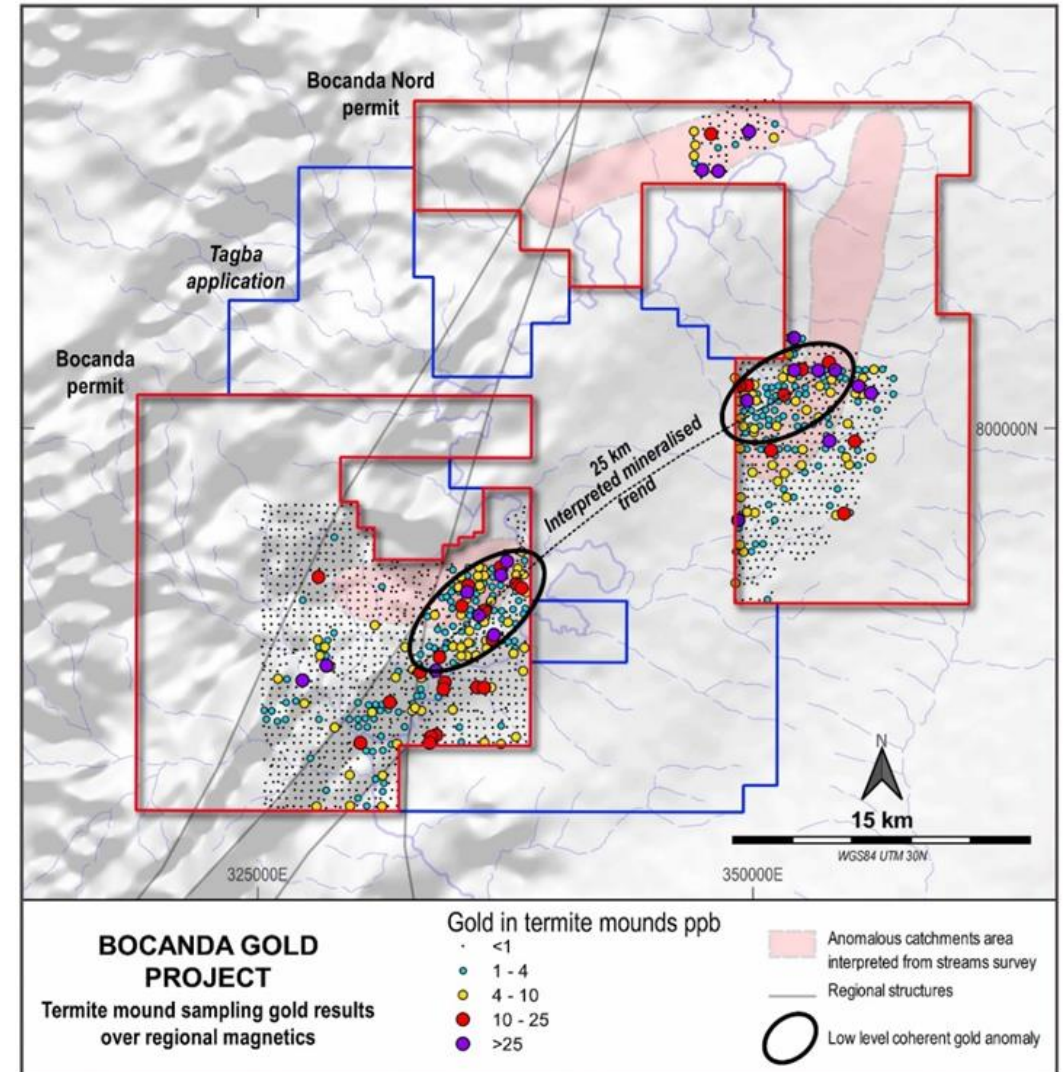

1. Refer to ASX announcement 17 November 2020

2. Refer to ASX announcement 22 January 2024

Appendix H

Bocanda Project, Côte d'Ivoire

- **Bocanda Nord, Bocanda permit granted**
- Bocanda Permits located on the Ouango-Fitini shear system, which is the southern extension of the Houndé greenstone belt in Burkina Faso
- Initial stream sediment sampling across the Bocanda granted permits identified three large gold targets for follow-up work¹
- Termite mounds sampling has returned two zones of gold anomalism, which are interpreted as being along the same potentially mineralised trend of 25 km strike²
- Follow-up reconnaissance auger program completed in April 2023 with 364m drilled

1. Refer ASX announcement 30 August 2021

2. Refer to ASX announcement 29 September 2022

Appendix I

Issia Project, Côte d'Ivoire

- **Issia permit granted**, with one additional permit under application
- Several zones of artisanal gold mining identified along strike and **spodumene rich pegmatites mapped**
- Regional stream sediment sampling survey complete
- Surface sampling grid (soils, gold and multi element assays) complete, with new **7km-long, strongly anomalous gold corridor delineated**¹
- Multiple +15 ppb Au returns and **peak gold-in-soil value of 19.8 g/t Au**¹
- **Two significant lithium anomalies** were also highlighted on the permit from soil and rock chip results, including **peak values of around 500 ppm Li**
- This corridor is set to be tested by an auger drilling program in Q1 2024

1. Refer ASX announcement 8 November 2023.
